The number one cause of turbo failure on the 1.6 TDCi engine is the build up of carbon around the injectors and the eventual failure of the injector oil seals. This is due to the injector sealing copper washer failing, resulting in carbon build-up in the injector sleeve. This rots the injector sleeve oil seal; carbon gets into the engine oil and will eventually cause turbo failure.

Our verdict on the Ford Focus 1.6 TDCi Econetic Edge Among the excellent but somewhat stately Focus range, the Econetic model is a necessity rather than a flagship. It adds to the range a headline act only in terms of fuel economy, and in almost all other ways is comparatively lacklustre for its price.

This proceedings book includes papers that cover the latest developments in automotive vehicles and environment, advanced transport systems and road traffic, heavy and special vehicles, new materials, manufacturing technologies and logistics and advanced engineering methods. Authors of the papers selected for this book are experts from research, industry and universities, coming from different countries. The overall objectives of the presentations are to respond to the major challenges faced by the automotive industry, and to propose potential solutions to problems related to automotive technology, transportation and environment, and road safety. The congress is organized by SIAR (Society of Automotive Engineers from Romania) in cooperation with SAE International. The purpose is to gather members from academia, industry and government and present their possibilities for investigations and research, in order to establish new future collaborations in the automotive engineering and transport domain. This proceedings book is just a part of the outcomes of the congress. The results presented in this proceedings book benefit researchers from academia and research institutes, industry specialists, Ph.D. students and students in Automotive and Transport Engineering programs.
