This truly outstanding book, first published in Russian in the 1970s and regarded as a classic, contains everything you need to know about how to deliver checkmate. 1000 Checkmate Combinations contains a wealth of elegant and sophisticated chess tactics as well as systematic and effective instruction. Each chapter covers a different piece or combination of pieces that is able to deliver checkmate, and provides illustrative templates for just about every mating formation. By working through the book, readers will develop their ability to recognise the potential for checkmate, as well as the know-how to execute one. Clearly written and beautifully organised, it will appeal to all chess players but particularly club players.

This biography attempts to shed light on all facets of Zermelo's life and achievements. Personal and scientific aspects are kept separate as far as coherence allows, in order to enable the reader to follow the one or the other of these threads. The presentation of his work explores motivations, aims, acceptance, and influence. Selected proofs and information gleaned from unpublished notes and letters add to the analysis.

'Chess is 99% tactics' is an old saying. This may be an exaggeration, but even the remaining 1% still depends on tactics. When Martin Weteschnik started working as a trainer in his local chess club, he quickly realised that even the stronger club players had great weaknesses in their tactical play. He also discovered that simply asking them to solve a huge number of puzzles did not fix the problem. These players clearly needed a good book, but when Weteschnik looked for it he found nothing suitable, so he decided to write it himself. But Weteschnik was not completely satisfied with the book and decided to restructure and rewrite it completely.

An original, endlessly thought-provoking, and controversial look at the nature of consciousness and identity argues that the key to understanding selves and consciousness is the "strange loop," a special kind of abstract feedback loop inhabiting our brains.

The Art of Checkmate, first published in Monaco in 1947, has remained one of the most popular and enduring chess books of all time, loved by chess players and regularly appearing in top ten lists of their favourites. Remarkably, despite its widespread popularity, the first English edition, published in the 1950s, was marred by careless and faulty translation. But now, for the first time, all these mistakes have been rectified so as to reflect accurately the authors' original work and thereby make the English edition of The Art of Checkmate an even better book. The Art of Checkmate offers the reader a systematic classification of all the principal types of checkmate and the procedures required to achieve these in actual play. Each chapter starts with the basic pattern of the checkmate under consideration and this is followed by an explanation of the process whereby the mate can be carried out. Examples from practical play and test yourself puzzle positions then reinforce the readers' understanding of the mechanics of the checkmate and their ability to deliver crushing and, at times, picturesque checkmates in their own games An enjoyable and easy-to-read book chess instructor that will benefit players of any ability.

Written by a distinguished cast of contributors, Alan Turing: Life and Legacy of a Great Thinker is the definitive collection of essays in commemoration of the 90th birthday of Alan Turing. This fascinating text covers the rich facets of his life, thoughts, and legacy, but also sheds some light on the future of computing science with a chapter contributed by visionary Ray Kurzweil, winner of the 1999 National Medal of Technology. Further, important contributions come from the philosopher Daniel Dennett, the Turing biographer Andrew Hodges, and from the distinguished logician Martin Davis, who provides a first critical essay on an emerging and controversial field termed "hypercomputation".

Nili Gold, who was born in Haifa to German-speaking parents in 1948, the first year of Israeli statehood, here offers a remarkable homage to her native city during its heyday as an international port and cultural center. Spanning the 1920s and '30s, when Jews and Arabs lived together amicably and buildings were erected that reflected European, modernist, Jewish, and Arab architectural influences, through 1948, when most Arabs left, and into the '50s and '60s burgeoning of the young state of Israel, Gold anchors her personal and family history in five landmark clusters. All in the neighborhood of Hadar HaCarmel, these landmarks define Haifa as a whole. In exquisite detail, Gold describes Memorial Park and its environs, including the border between the largest Jewish and Arab neighborhoods in Haifa; the intersection of Herzl and Balfour Streets, whose highlight is the European/Middle Eastern Technion edifice; Talpiot Market, recalling Haifa as a lively commercial hub; Alliance High School and the Great Synagogue, the former dedicated to instilling a love of intellectual pursuits, while the synagogue was an arm of the dominant Israeli religious establishment; the Ge'ula Elementary School and neighboring buildings that played a historical role, among them, the Struck House, with its Arab-inspired architecture - all against the dramatic backdrop of the mountain, sea, and bay, and their reverberations in memory and literature. Illustrated with more than thirty-five photographs and six maps, Gold's astute observations of the

changing landscape of her childhood and youth highlight literary works that portray deeply held feelings for Haifa, by such canonical Israeli writers as A. B. Yehoshua, Sami Michael, and Dahlia Ravikovitch.
