### ~~36.2 — The Muscular System~~

The muscular system consists of all the muscles of the body. There are three types of muscle: skeletal muscle (which is attached to bones and enables voluntary body movements), cardiac muscle (which makes up the walls of the heart and makes it beat), and smooth muscle (which is found in the walls of internal organs and other internal structures and controls their movements).

## ~~Chapter 36 Biology The Muscular System~~ Answers

Besides skeletal muscles, the muscular system also includes cardiac muscle - which makes up the walls of the heart - and smooth muscles, which control movement in other internal organs and structures. Muscle tissue is a soft tissue that makes up most of the tissues in the muscles of the human muscular system.
