to create your own
printables ...*

In this type of 3D printing, the material, usually ABS or PLA plastic, is melted down by the printer head and extruded onto the printer bed, similar to how ink is deposited onto a page on a paper printer. The extruder head of the printer lays down material layer by layer to build up a 3D model, and each layer fuses to the previous one as it cools.

Creating true transparency in 3D printing is something that has been attempted several times over the years. Nowadays, the technology and techniques needed to come up with clear 3D prints have been well-established. This does not mean that it's going to be easy. If this is your first time attempting it, then you can expect a lot of trial and ...
