A fact-filled, 240-page manual that covers every aspect of designing and planning a basement conversion/remodeling project. With more than 600 color photographs, this book goes into thorough detail on crucial subjects like moisture and climate control, egress, ventilation, lighting, and many other issues. It deals comprehensively with adapting home mechanical systems to basement conditions. The many featured projects include finishing a bathroom stub-out, installing an all-new basement bathroom, insulating, repairing foundation walls, installing sump pumps, dehumidification strategies, as well as many other projects designed for livability. A special focus new to this edition presents information and projects for aging in place, including home elevators and chair lifts, monitoring and communication systems, and creating an accessible basement apartment. You will also find projects that show how to upgrade with luxury amenities, including a fireplace, sauna, home spa, exercise room, basement club/lounge and more.

The bestselling step-by-step framing guide—updated and expanded to meet 2018 codes and standards Complete Book of Framing, Second Edition—Updated and Expanded is a comprehensive guide to rough carpentry and framing, written by an expert with over forty years of framing experience. This book guides the reader through step-by-step framing instructions for floors, walls, roofs, door and window openings, and stairs. Hundreds of full-color illustrations and photos enable novice and professional framers to understand and master framing techniques. This Updated and Expanded Second Edition includes the framing techniques of the 2018 International Building Code (IBC), International Residential Code (IRC), and updated OSHA rules. It also includes new coverage of today's electric tools, wind and earthquake framing, medical and physiological factors of framing, and a revised safety chapter. Builders will find information on nailing patters, overall layout, engineered wood patterns, and green framing. In addition, the book offers readers tools and techniques for preparing for a job and managing a team. This Second Edition—Updated and Expanded: Includes hundreds of full-color illustrations depicting step-by-step framing techniques Offers guidance on today's electric tools and structural enhancements for natural disasters Features a revised chapter on safety to reflect the medical and physiological factors of framing Meets the framing techniques of the 2018 International Building Code (IBC), International Residential Code (IRC), and Occupational Safety and Health Administration (OSHA) standards Complete Book of Framing: An Illustrated Guide for Residential Construction, Second Edition—Updated and Expanded is an excellent resource for framers, carpenters, and contractors of all experience levels. Framer-friendly tips throughout the book show how to complete framing tasks efficiently and effectively.

There cannot be a hunter and angler who has not, at some time or other, daydreamed about building his or her own camp. Hunting & Fishing Camp Builder ' s Guide provides the concepts, plans, and know-how to turn a daydream into a reality. Monte Burch applies decades of how-to skills to describe the “ ins and outs ” of design and construction. From the cabin to the furniture inside, you can do it all yourself and create the camp or lodge of your dreams.

This new edition of A Guide to Energy Management in Buildings begins by asking why we need to control energy use in buildings and proceeds to discuss how the energy consumption of a building can be assessed or estimated through an energy audit. It then details a range of interventions to reduce energy use and outlines methods of assessing the cost-effectiveness of such measures. Topics covered include: where and how energy is used in buildings energy audits measuring and monitoring energy use techniques for reducing energy use in buildings legislative issues. And new in this edition: the cooling of buildings fuel costs and smart metering and education and professional recognition. It provides a template for instigating the energy-management process within an organization, as well as guidance on management issues such as employee motivation, and gives practical details on how to carry the process through. This book should appeal to building and facilities managers and also to students of energy management modules in FE and HE courses.
