The conversation continues. What if a stranger knew you better than you know yourself? Exasperated by her husband's sudden new obsession with Jesus, Mattie Cominsky views an out-of-town business trip as a welcome opportunity to reflect on their marriage—and to decide if it's time to put an end to this painfully unrewarding relationship. Aboard the plane, Mattie is relieved to find herself seated next to a passenger who shares her scorn for religion. After she confides her husband's unexpected turn, their conversation soon leads to a fascinating exploration of spirituality, God, and the quest for meaningful connection. Mattie's skepticism softens under the perceptive insights of this stranger, and she finds herself confronting the unspoken longings of her soul. As his comments touch on personal issues he couldn't possibly know about, she begins to wonder if she's misjudged not only Nick but also the God he now claims to believe in.

By the author of Rosemary's Baby, a horrifying journey into a future only Ira Levin could imagine. Considered one of the great dystopian novels—alongside Anthony Burgess's A Clockwork Orange and Aldous Huxley's Brave New World—Ira Levin's frightening glimpse into the future continues to fascinate readers even forty years after publication. The story is set in a seemingly perfect global society. Uniformity is the defining feature; there is only one language and all ethnic groups have been eugenically merged into one race called "The Family." The world is ruled by a central computer called UniComp that has been programmed to keep every single human on the surface of the earth in check. People are continually drugged by means of regular injections so that they can never realize their potential as human beings, but will remain satisfied and cooperative. They are told where to live, when to eat, whom to marry, when to reproduce. even the basic facts of nature are subject to the UniComp's will—men do not grow facial hair, women do not develop breasts, and it only rains at night. With a vision as frightening as any in the history of the science fiction genre, This Perfect Day is one of Ira Levin's most haunting novels.

Astutely observed and deftly witty, One Perfect Day masterfully mixes investigative journalism and social commentary to explore the workings of the wedding industry—an industry that claims to be worth \$160 billion to the U.S. economy and which has every interest in ensuring that the American wedding becomes ever more lavish and complex. Taking us inside the workings of the wedding industry—including the swelling ranks of professional event planners, department stores with their online registries, the retailers and manufacturers of bridal gowns, and the Walt Disney Company and its Fairy Tale Weddings program—New Yorker writer Rebecca Mead skillfully holds the mirror up to the bride's deepest hopes and fears about her wedding day, revealing that for better or worse, the way we marry is who we are.
