To increase the number of physicians who choose to work in rural practice, strategies must encompass and promote continuity across all three of these phases. The results of this systematic review will allow for the identification of areas of priority that require further attention to develop appropriate strategies to improve the number of family physicians working in rural and remote locations

This systematic literature review confirms that rural social enterprises are characterised by strong local involvement with an ability to combine different goals and resources. Based on this review, we suggest that the rural and local contexts, often combined with tailored external support, are important factors in enabling rural social enterprises.

Systematic reviews ...

This paper presents a systematic review of the literature on urban–rural comparisons on various outcomes for informal carers who provide care for elderly people in the community. Of 150 articles that were reviewed, eight articles were included with three themes in the outcomes for carers: service use, health promotion behaviors and psychological health (such as carer stress, burden or depressive symptoms).
