Gravenstein. Coe ' s Golden Drop. Mendocino Cox. The names sound like something from the imagination of Tolkien or perhaps the ingredients in a dubious magical potion rather than what they are—varieties of apples. But as befits their enchanting names, apples have transfixed and beguiled humans for thousands of years. Apple: A Global History explores the cultural and culinary importance of a fruit born in the mountains of Kazakhstan that has since traversed the globe to become a favorite almost everywhere. From the Garden of Eden and Homer ' s Odyssey to Johnny Appleseed, William Tell, and even Apple Computer, Erika Janik shows how apples have become a universal source of sustenance, health, and symbolism from ancient times to the present day. Featuring many mouthwatering illustrations, this exploration of the planet ' s most popular fruit includes a guide to selecting the best apples, in addition to apple recipes from around the world, including what is believed to be the first recorded apple recipe from Roman gourmand Marcus Apicius. And Janik doesn ' t let us forget that apples are not just good eating; their juice also makes for good drinking—as the history of cider in North America and Europe attests. Janik grew up surrounded by apple iconography in Washington, the " apple state, " so there is no better author to tell this fascinating story. Readers will eat up this surprising and entertaining tale of a fruit intricately linked to human history.

The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science. When young Joseph Banks stepped onto a Tahitian beach in 1769, he hoped to discover Paradise. Inspired by the scientific ferment sweeping through Britain, the botanist had sailed with Captain Cook in search of new worlds. Other voyages of discovery—astronomical, chemical, poetical, philosophical—swiftly follow in Richard Holmes's thrilling evocation of the second scientific revolution. Through the lives of William Herschel and his sister Caroline, who forever changed the public conception of the solar system; of Humphry Davy, whose near-suicidal gas experiments revolutionized chemistry; and of the great Romantic writers, from Mary Shelley to Coleridge and Keats, who were inspired by the scientific breakthroughs of their day, Holmes brings to life the era in which we first realized both the awe-inspiring and the frightening possibilities of science—an era whose consequences are with us still. BONUS MATERIAL: This ebook edition includes an excerpt from Richard Holmes's Falling Upwards.
