I guess I forgot to type out my longer answer: for most people in "electronics engineering", as typically defined (industry & selftaught/Bachelors level stuff [which is most], excluding theoretical research [yes, there are theoretical researchers in ElecE!]), >90% of people will not use advanced math. you can probably forget how to do anything manually above first year univ math. any higher level stuff, you'll probably just have a computer to do it for you, if it needs to be done at all.
