This book forms part of the Evergetis Project which aims to investigate all surviving texts associated with the Monastery of the Theotokos Evergetis founded in 1049 near Constantinople. A book-length introduction sets out the historical significance of the house for the development of Byzantine monasticism and discusses its administration, liturgy and way of life. An English translation of the Hypotyposis (the monastery’s foundation document) is provided, accompanied by detailed notes. Previous scholarship on the authorship of the Hypotyposis and the evolution of the text is discussed and linguistic analysis used to suggest that traces of the original foundation document by Paul Evergetinos can be identified within it. The Hypotyposis was widely used as a model for later Byzantine and Slavonic typika and the precise relationship of these documents one to the other is demonstrated in detail. The volume also includes prosopographical material on the known patrons of the monastery, a discussion of its library, English translations of later Greek and Latin texts referring to the monastery and a suggested reconstruction of Paul Evergetinos’ original foundation document.

This two-volume set constitutes the refereed proceedings of the 11th International Conference on Industrial and Engineering Applications of Artificial Intelligence and Expert Systems, IEA/AIE-98, held in Benicassim, Castellon, Spain, in June 1998.The two volumes present a total of 187 revised full papers selected from 291 submissions. In accordance with the conference, the books are devoted to new methodologies, knowledge modeling and hybrid techniques. The papers explore applications from virtually all subareas of AI including knowledge-based systems, fuzzyness and uncertainty, formal reasoning, neural information processing, multiagent systems, perception, robotics, natural language processing, machine learning, supervision and control systems, etc..

This book is a complete guide for people who want to learn the Korean language, starting from the very beginning, and learn the alphabet and the correct sounds of vowels, consonants, and diphthongs. It was written for people who want an easy but systematic approach to the language. The writer is a non-native speaker who started learning the language from ZERO, just like you and spent years in Korea trying to reach a better level of proficiency in Korean. After a few weeks of study, you will study to recognize words, make sentences, and have simple (but miraculous) conversations with other Korean speakers!
