A Cold Civil War has engulfed the nation. After a deadly pandemic, shocking incidents of police brutality, a racial justice crisis, and the fall of a dangerous demagogue, America remains more divided than at any time in decades. At the heart of this national crisis is the fear of a darkening America—a country in which there is no longer a predominant white majority. As the Republican Party has lost the popular vote in seven of the last eight presidential elections, its leaders have incited white Americans in a last-ditch race against time to stop the advance of a new, multiracial emerging majority. Keith Boykin, long time political commentator, has watched this white resentment consume the GOP over the course of a life in politics, activism, and journalism. He has also observed the divisions among Democrats, as white progressives have postponed demands for full racial equity, while Black voters have often been too forgiving of party leaders who have failed to deliver. America can no longer avoid its long overdue reckoning with the past, Boykin argues. With the familiarity of personal experience and the acuity of historical insight, Boykin urges us to fight racism, sexism, xenophobia, and homophobia, and save the union, not just by making Black lives matter, but by making Black lives equal.

An in-depth chronicle of the black labor movement in Detroit

Marshaling evidence from a wide array of international sources, including the black presses of the time, Penny M. Von Eschen offers a vivid portrayal of the African diaspora in its international heyday, from the 1945 Manchester Pan-African Congress to early cooperation with the United Nations. Tracing the relationship between transformations in anti-colonial politics and the history of the United States during its emergence as the dominant world power, she challenges bipolar Cold War paradigms. She documents the efforts of African-American political leaders, intellectuals, and journalists who forcefully promoted anti-colonial politics and critiqued U.S. foreign policy. The eclipse of anti-colonial politics—which Von Eschen traces through African-American responses to the early Cold War, U.S. government prosecution of black American anti-colonial activists, and State Department initiatives in Africa—marked a change in the very meaning of race and racism in America from historical and international issues to psychological and domestic ones. She concludes that the collision of anti-colonialism with Cold War liberalism illuminates conflicts central to the reshaping of America; the definition of political, economic, and civil rights; and the question of who, in America and across the globe, is to have access to these rights.

"For almost two decades, investigative journalist Jerry Mitchell doggedly pursued the Klansmen responsible for some of the most notorious murders of the civil rights movement. This book is his amazing story. Thanks to him, and to courageous prosecutors, witnesses, and FBI agents, justice finally prevailed." —John Grisham, author of *The Guardians* On June 21, 1964, more than twenty Klansmen murdered three civil rights workers. The killings, in what would become known as the "Mississippi Burning" case, were among the most brazen acts of violence during the civil rights movement. And even though the killers' identities, including the sheriff's deputy, were an open secret, no one was charged with murder in the months and years that followed. It took forty-one years before the mastermind was brought to trial and finally convicted for the three innocent lives he took. If there is one man who helped pave the way for justice, it is investigative reporter Jerry Mitchell. In *Race Against Time*, Mitchell takes readers on the twisting, pulse-racing road that led to the reopening of four of the most infamous killings from the days of the civil rights movement, decades after the fact. His work played a central role in bringing killers to justice for the assassination of Medgar Evers, the firebombing of Vernon Dahmer, the 16th Street Church bombing in Birmingham and the Mississippi Burning case.

Acces PDF American In A Race Against Time To Bring Down Terrorists A High Octane Thriller That Will Keep You Guessing The Mitch Rapp Series

Mitchell reveals how he unearthed secret documents, found long-lost suspects and witnesses, building up evidence strong enough to take on the Klan. He takes us into every harrowing scene along the way, as when Mitchell goes into the lion's den, meeting one-on-one with the very murderers he is seeking to catch. His efforts have put four leading Klansmen behind bars, years after they thought they had gotten away with murder. *Race Against Time* is an astonishing, courageous story capturing a historic race for justice, as the past is uncovered, clue by clue, and long-ignored evils are brought into the light. This is a landmark book and essential reading for all Americans.

Welfare Racism analyzes the impact of racism on US welfare policy. Through historical and present-day analysis, the authors show how race-based attitudes, policy making, and administrative policies have long had a negative impact on public assistance programs. The book adds an important and controversial voice to the current welfare debates surrounding the recent legislation that abolished the AFDC.

From the New York Times bestselling author of *Tears We Cannot Stop*, a passionate call to America to finally reckon with race and start the journey to redemption. This eBook edition includes nine illustrations of George Floyd, Breonna Taylor and Emmett Till, among other victims of racial violence, by artist Everett Dyson. "Antiracist demonstrations have been like love notes to the martyrs of racist terror and anti-Blackness. Michael Eric Dyson writes out these love notes in this powerfully illuminating, heart-wrenching, and enlightening book. *Long Time Coming* is right on time." —Ibram X. Kendi, bestselling author of *How to Be an Antiracist* "Crushingly powerful, *Long Time Coming* is an unfiltered Marlboro of black pain." —Isabel Wilkerson, author of *Caste: The Origins of Our Discontents* "Formidable, compelling...has much to offer on our nation's crucial need for racial reckoning and the way forward." —Bryan Stevenson, author of *Just Mercy* The night of May 25, 2020 changed America. George Floyd, a 46-year-old Black man, was killed during an arrest in Minneapolis when a white cop suffocated him. The video of that night's events went viral, sparking the largest protests in the nation's history and the sort of social unrest we have not seen since the sixties. While Floyd's death was certainly the catalyst, (heightened by the fact that it occurred during a pandemic whose victims were disproportionately of color) it was in truth the fuse that lit an ever-filling powder keg. *Long Time Coming* grapples with the cultural and social forces that have shaped our nation in the brutal crucible of race. In five beautifully argued chapters—each addressed to a black martyr from Breonna Taylor to Rev. Clementa Pinckney—Dyson traces the genealogy of anti-blackness from the slave ship to the street corner where Floyd lost his life—and where America gained its will to confront the ugly truth of systemic racism. Ending with a poignant plea for hope, Dyson's exciting new book points the way to social redemption. *Long Time Coming* is a necessary guide to help America finally reckon with race.

An urgent and daring examination of how American racism has broken the country's social compact, eroded America's common goods, and damaged the lives of every American--and a heartfelt look at how these deep wounds might begin to heal. Compared to other industrialized nations, the United States is losing ground across nearly every indicator of social health. Its race problem, argues Eduardo Porter, is largely to blame. In *American Poison*, the New York Times veteran shows how racial animus has stunted the development of nearly every institution crucial for a healthy society, including organized labor, public education, and the social safety net. The consequences are profound and are only growing graver with time. Leading us through history and across America--from FDR's New Deal through Bill Clinton's welfare reform to Donald Trump's retrograde and divisive policies--Porter pieces together how racial hostility has blocked American social cohesion at every turn, producing a nation that fails not only its black and brown citizens but white Americans as well. *American Poison* is at once a broad, rigorous argument, and a profound *cri de coeur*. Even as it uncovers our most tenacious national pathology, it points the way toward hope, illuminating the ways in which, as the nation becomes increasingly diverse, it may well be possible to construct a new understanding of racial identity--and a more cohesive society on top of it.

Race for Empire offers a profound and challenging reinterpretation of nationalism, racism, and wartime mobilization during the Asia-Pacific war. In parallel case studies—of Japanese Americans mobilized to serve in the United States Army and of Koreans recruited or drafted into the Japanese military—T. Fujitani examines the U.S. and Japanese empires as they struggled to manage racialized populations while waging total war. Fujitani probes governmental policies and analyzes representations of these soldiers—on film, in literature, and in archival documents—to reveal how characteristics of racism, nationalism, capitalism, gender politics, and the family changed on both sides. He demonstrates that the United States and Japan became increasingly alike over the course of the war, perhaps most tellingly in their common attempts to disavow racism even as they reproduced it in new ways and forms.

While many studies of race relations have focused on the black experience, *Race against Time* strives to unravel the emotional and cultural foundations of race in the white mind. Jack E. Davis combed primary documents in Natchez, Mississippi, and absorbed the town's oral history to understand white racial attitudes there over the past seven decades, a period rich in social change, strife, and reconciliation. What he found in this community that cultivates for profit a romantic view of the Old South challenges conventional assumptions about racial prejudice. Davis engagingly and effortlessly weaves between nineteenth and twentieth centuries, white observations and black, to describe patterns of social interaction in Natchez in the workplace, education, politics, religion, and daily life. It was not, he discovers, false notions of biological differences reinforced by class and economic conflict that lay at the heart of the town's racial divide but rather the perception of a black/white cultural divergence -- in values in education, work, and family. White culture was deemed superior, a presumption manifested through a hierarchy of old-family elite and other white citizens. Since 1930, Natchez has developed a major tourist industry, downsized sharecropping, expanded its manufacturing sector, and participated in the struggles for civil rights, school desegregation, and black political empowerment. Yet the collective white perception of a mythic past has continued, reinforced through the sum of Natchez's public history -- social memory, school textbooks, breathtaking antebellum mansions, and world-famous Pilgrimage. In *Race against Time*, Davis sensitively lays bare the need for shared control of the town's history and the acknowledgment of intercultural dependence to effect true racial equality. Building upon the 1941 classic *Deep South: A Social Anthropological Study of Caste and Class*, Davis brings tremendous passion and insight to the demanding issue of race as he fathoms the contours of Natchez's distinctive racial dynamics in recent decades.

Presents primary documents to support an exploration of race relations in the United States from 1785 to the present.
