done by the leading scholar in the field, which nicely integrates the work on the American Revolution over the last three decades but never loses contact with the older, classic questions that we have been arguing about for over two hundred years."—Joseph J. Ellis, author of *Founding Brothers* A magnificent account of the revolution in arms and consciousness that gave birth to the American republic. When Abraham Lincoln sought to define the significance of the United States, he naturally looked back to the American Revolution. He knew that the Revolution not only had legally created the United States, but also had produced all of the great hopes and values of the American people. to freedom, constitutionalism, the well-being of ordinary people, and equality-came out of the Revolutionary era. Lincoln saw as well that the Revolution had convinced Americans that they were a special people with a special destiny to lead the world toward liberty. The Revolution, in short, gave birth to whatever sense of nationhood and national purpose Americans have had. revolution. Ideologically defined by the colonists' formal Declaration of Independence in 1776, the struggle has taken on something of a mythic character. From the Boston Tea Party to Paul Revere's ride to raise the countryside of New England against the march of the Redcoats; and from the American travails of Bunker Hill (1775) to the final humiliation of the British at Yorktown (1781), the entire contest is now emblematic of American national identity.

Stephen Conway shows that, beyond mythology, this was more than just a local conflict: rather a titanic struggle between France and Britain. The Thirteen Colonies were merely one frontline of an extended theatre of operations, with each superpower aiming to
