Roots for roses come in two types. Anchor roots are thick, hold the rose in the ground and store nutrients throughout winter; hair roots are thin and absorb nutrients from the soil. Rose leaves are composed of "leaflets" carrying three to seven leaves arranged along the sides of a stem called a "petiole."

Rose Plant~~

The stamens of roses are usually yellow, although sometimes they are red or maroon. The total number of stamens depends on the species of rose. No rose plant has fewer than five stamens, but this number can be much higher. Pistils. The female portion of the flower, the pistil, is located at the center of the stamens.
