forces.

Provides general information about helicopters and specific facts about the features and operation of the Apache helicopter.

Nuova edizione riveduta e aggiornata. Il Boeing AH-64 Apache è un elicottero d'attacco sviluppato negli Stati Uniti d'America a partire dagli anni settanta. Utilizza un rotore principale e uno di coda, entrambi a quattro pale. L'elicottero è stato concepito come bimotores biposto in tandem, per l'impiego in missioni anticarro, assalto, scorta e caccia anti-elicottero, da svolgere in ogni condizione di tempo e di luce. L'armamento principale è costituito da un cannone automatico M230 Chain Gun calibro 30 mm. Può venire equipaggiato con una combinazione di missili anticarro, razzi e missili aria-aria agganciati alle alette laterali. L'Apache è il principale elicottero d'attacco dell'esercito degli Stati Uniti e il successore del Bell AH-1 Cobra. Fu progettato dalla Hughes Helicopters per soddisfare i requisiti del programma "elicottero d'attacco avanzato" (in inglese AAH o Advanced Attack Helicopter) varato dall'U.S. Army nel 1972. In seguito, la McDonnell Douglas acquisì la Hughes Helicopters e continuò lo sviluppo dell'AH-64, ottenendo l'AH-64D Apache Longbow. Al termine di varie vicende societarie, il progetto è stato acquisito dalla Boeing Defense, Space & Security che ne continua la produzione per le esigenze statunitensi e per l'esportazione verso altri paesi. Gli Apache hanno visto il primo impiego operativo in battaglia in occasione dell'impegno dell'U.S. Army durante l'invasione di Panama del 1989. Altri impieghi bellici dell'elicottero da parte dell'esercito statunitense sono stati la Guerra del Golfo del 1991, la guerra del Kosovo nel 1999, la guerra in Afghanistan del 2001 e la guerra d'Iraq del 2003. Gli AH-64 israeliani hanno partecipato a tutte le principali operazioni militari del proprio paese a partire dagli anni novanta."

The Boeing (McDonnell Douglas, formerly Hughes) AH-64A Apache is the US Army's primary attack helicopter, and the most advanced helicopter gunship flying today. The most expensive rotary-winged aircraft ever built when it was introduced in the early 1980s, it has since proved its worth on battlefields all over the world, seeing action in the Gulf War, Afghanistan, Bosnia, Kosovo and the recent conflict in Iraq. This book examines the design, development and deployment of a quick-reacting, airborne weapons system that can fight close and deep to destroy, disrupt, or delay enemy forces.

With its distinctive double-cockpit design, the Mi-24 'Hind' is arguably the most recognizable war machine of the Cold War, and has achieved near-legendary status in the annals of military history. The first Soviet helicopter to function as both a gunship and an assault transport, it served extensively in Afghanistan, and is now employed by militaries across the world. Written by an expert on the 'Hind', an drawing on manufacturing and military sources, this book presents the Mi-24 in all of its brutal glory, from design and development to deployment and combat. Also included are a number of color plates showing the distinct paint schemes employed by various nations in a range of theaters/ theatres and for different armies.

engine supersonic jet trainer. The McDonnell Douglas (now Boeing) AV-8B Harrier II is a second-generation vertical/short takeoff and landing (V/STOL) ground-attack aircraft. The Rockwell (now part of Boeing) B-1 Lancer is a four-engine variable-sweep wing strategic bomber used by the United States Air Force (USAF). The Northrop Grumman B-2 Spirit (also known as the Stealth Bomber) is an American strategic bomber, featuring low observable stealth technology designed for penetrating dense anti-aircraft defenses; it is able to deploy both conventional and nuclear weapons.

This is a collection of the Ray Prouty's columns in Rotor and Wing and American Helicopter Society's Vertiflite magazine from 1992 to 2004.

Within these pages you will find stories of the real Old West...THE GOOD, THE BAD and THE UGLY. These are interesting stories of folks that you may or may not have heard of previously. Elmer McCurdy was killed by a posse and then spent 66 years touring the country before he was buried. Three ladies were kidnapped by Indians; one made a harrowing escape; one was killed and mutilated; one died of a broken heart when she could not return to her adopted tribe. "Big Nose" Kate set a town on fire to help her man escape the law. One young shepherd was murdered by two brothers and ended up buried next to one of them. Deputy Elfego Baca had as many as 4000 rounds fired at him by 100 cowboys and was unharmed, not so the cowboys. Montana vigilantes hanged five men at the same time from a rafter in a drug store. Thornburgh, the Wonder Dog, was far more than just the pet of Fort Bridger, Wyoming. Alfred Packer may or may not have murdered the rest of his party, but he did eat them. These are a few of the fascinating stories you will find inside this book.
