The book I read to research this post was Apache by Ed Macy which is an excellent book which I bought from a carboot sale. Whether you agree with the war in Afghanistan or not this book which is mostly about the rescue of a marine who was captured by the Taliban and had to be rescued from a huge compound is fantastic.

Apache. Ed Macy by Ed Macy - Goodreads

Apache is a well written account somewhere in the middle years of the conflict. ISAF were responding with massive ordinance and air strikes against single Taliban targets. The kit was available and was used. Ed Macy brings this considered balanced response out well in the text.

Apache: Ed Macy: 9780007288168: Amazon.com: Books

Ed Macy brings this considered balanced response out well in the text. Yes there is plenty of action and hot gun barrels and he clearly enjoyed flying the Apache helicopter. However there is also the use of brains and how best to defeat their enemy within measure.

"A truly amazing portrayal of the technical, the emotional, and the courageous. Macy puts the reader in the cockpit of our most lethal attack platform." —Dick Couch, New York Times bestselling author
Apache is the incredible true story of Ed Macy, a decorated Apache helicopter pilot, that takes you inside one of the world's most dangerous war machines. A firsthand account of the exhilaration and ferocity of war, Apache chronicles a rescue mission involving a stranded soldier in Afghanistan in 2007. Ed Macy had always dreamed of a career in the army, so when the British Army Air Corps launched its attack helicopter program, Macy bent every rule in the book to make sure he was the first to sign up to fly the Apache—the deadliest, most technically advanced helicopter in the world and the toughest to fly. In 2007, Macy's Apache squadron was dispatched to Afghanistan's notorious Helmand Province with the mission to fight alongside and protect the men on the ground by any means necessary. When a marine goes missing in action, Macy and his team know they are the Army's only hope of bringing him back alive. Apache is Macy's story—an adrenalin-fueled account of one of the most daring actions of modern wartime, and a tale of courage, danger, and comradeship you won't be able to put down. —A

fantastic, totally exhilarating roller-coaster read. □ □Sgt. Maj. Dan Mills, author of *Sniper One*

May 2006. Pilot Ed Macy arrives in Afghanistan with a contingent of the Apache AH Mk1. It's the first operational tour for the deadly machines and confidence in the crippling expensive attack helicopter is low. It doesn't help that for their first month 'in action', Ed and his mates see little more than the back-end of a Chinook. But when the men of 3 Para get pinned down during Op Mutay, reservations about the fearsome new attack helicopters are thrown out the window. In the blistering firefight that follows, Ed unleashes the first ever Hellfire missile in combat and, with one squeeze of the trigger, changes the war in Afghanistan forever. What had been rumoured as a £4.2 billion mistake quickly becomes the British Army's greatest asset, as the awe-inspiring Apache is dramatically redirected to fight the enemy head-on. In this gripping account of war on the ground and in the skies above the dusty wastes of Helmand, Ed recounts the intense months that followed: the steep learning curve, the relentless missions, the evolving enemy and the changing Rules of Engagement. As he comes to grip with the Apache, his early career as a paratrooper stands him in good stead, as does his operational baptism as a pilot. Both shaped his ability to fly, fight and survive during that fateful first Afghanistan tour against a cunning and ruthless enemy. Ed will need every ounce of willpower and skill to succeed over the long, hot Helmand summer, as he and his colleagues find themselves on trial for their lives and for the reputation of a machine on which the British government had staked a fortune. The crucible of fire that awaited them would cement the fate of man and machine forever.

The Apache attack helicopter is one of the world's most awesome weapons systems. Deployed for the first time in Afghanistan, it has already passed into legend. The only thing more incredible than the Apache itself are the pilots who fly her. For the first time, Apache Dawn tells their story—and their baptism of fire in the unforgiving battle of Helmand province. Their call sign was "Ugly"—and there was no better word for the grueling hundred-day deployment they endured. Day after day, four of England's Army Air Corps' finest pilots flew right into the heart of battle, testing their aircraft to the very limit. Apache Dawn takes the reader with them on a series of unrelenting and brutally intense combat missions, from daring, edge-of-the-seat rescues to dramatic close-air support in the white heat of battle. Bestselling author Damien Lewis has been given unprecedented access to these heroic aircrews and to the men on the ground whose lives they saved. It is an astounding story of bravery, skill, and resilience in the face of unbelievable odds. And it is the story of the Apache itself—the ultimate fighting machine.

In May 2011, after a Mediterranean exercise to prove the Apache's ability to work shipborne, HMS Ocean and her embarked Apache attack helicopters from 656 Squadron, Army Air Corps were about to head home. But the civil war in Libya and the resulting NATO air campaign intervened. A few days later the Author and his fellow Apache pilots were in action at night over hostile territory. Within the range of Gaddafi's capable air defense systems and land forces once in sight of the coast, they had to fight their way into Libya, complete their mission evading lethal ground fire, before the hazardous return to Ocean. Despite Libya's state-of-the-art arsenal of ground-to-air weapons, the Apaches made nightly raids at ultra low-level behind enemy lines. Apache Over Libya describes the experiences of eight Army and two Royal Navy pilots who played a significant role in the NATO-led campaign. Despite fighting the best armed enemy British aircrew have faced in generations, they defied the odds and survived. Thrilling first hand action accounts vividly convey what it means to fly the Apache in combat at sea and over enemy-held terrain. An unforgettable and unique account which gives a rare insight into attack helicopter operations in war.

True stories of the spookiest sites in this beautiful South Carolina city—includes photos! On the historic streets of Charleston, true life is sometimes stranger than fiction. In this book, Ed Macy and Geordie Buxton share stories of the paranormal in ghastly and sometimes dreadful detail. Combing through the oft-forgotten enclaves of the Holy City, they bring readers face to face with: The orphans who haunt a

dorm at the College of Charleston A Citadel cadet who haunts a local hotel The specter of William Drayton at Drayton Hall Plantation And more! Enriched by historic background information and specific details that are often lost in ghost stories, this collection sparks curiosity about what might still be lurking in the alleyways of Charleston's storied streets.

"The risk of a fatal catastrophe was constant. The NVA was the enemy, but the ultimate opponent was, quite simply, death. . . ." For assault helicopter crews flying in and around the NVA-infested DMZ, the U.S. pullout from Vietnam in 1970-71 was a desperate time of selfless courage. Now former army warrant officer Tom Marshall of the Phoenix, C Company, 158th Aviation Battalion, 101st Airborne, captures the deadly mountain terrain, the long hours flown under enormous stress, the grim determination of hardened pilots combat-assaulting through walls of anti-aircraft fire, the pickups amid exploding mortar shells and hails of AK fire, the nerve-racking string extractions of SOG teams from North Vietnam. . . . And, through it all, the rising tension as helicopter pilots and crews are lost at an accelerating pace. It is no coincidence that the Phoenix was one of the most highly decorated assault helicopter units in I Corps. For as the American departure accelerated and the enemy added new, more powerful anti-aircraft weapons, the helicopter pilots, crew chiefs, and gunners paid the heavy price of withdrawal in blood. For more than 30 Percent of Tom Marshall's 130 helicopter-school classmates, the price of exit was their lives. . . .

Autobiography of Australia's first full-time helicopter doctor. Describes his passion for flying, his crew membership of the Surf Life Saving Association rescue helicopter, and his role in developing the operations of CareFlight. Tells of the many helicopter rescues he has made. Includes full-colour photos. Foreword by Dr Fran Smith. Author is a doctor with specialist qualification in anaesthesia, who teaches advanced resuscitation and crisis management skills to other anaesthetists.

Days after arriving in Kandahar, the Harriers of 800 Naval Air Squadron were in the thick of fierce fighting. Armed with rockets and bombs, the pilots were flying crucial danger-close attack missions in defence of troops engaged in the most intense battles seen by British forces since the Korean War. While facing the constant threat of surface-to-air missiles, the British Top Guns knew that any mistake would have fatal consequences for the soldiers who depended on their skill and determination. Written by the Commanding Officer of the first Royal Navy squadron to deploy to Afghanistan, Joint Force Harrier is a compelling insight into the exciting world of modern air warfare.

The helicopter was introduced to warfare during World War II. Since then, it has had a profound effect at both the tactical and strategic levels. This in-depth book by a military aviation expert examines the growth of the helicopter's importance in warfare and argues convincingly that severe flaws in the military procurement process have led to U.S. troops using antiquated helicopter designs in combat despite billions spent on research and development.

'Luke Skywalker, this is Deathstar, Move to our location now.' 'Gents, we've got a shout . . . ' The IRT crew were being scrambled. Helmand, 2006- 3 Para were under heavy fire in Sangin and taking casualties. Mark Hammond pulled on his boots, holstered his Browning 9mm pistols and ran to the waiting Chinook. Once airborne, he'd be dodging tracer rounds and RPGs. It was going to be a long night for Hammond and his crew. And one for which he would be decorated for his courage under fire. He'd been in theatre less than a week. It was the beginning of a roller-coaster tour of duty in Helmand that saw British forces engaged in the most ferocious fighting since the Korean War. For much of the time they were hanging on by their fingertips, holed up in remote platoon houses, outnumbered, facing relentless assault and nearly overwhelmed. Only the Chinooks kept them in the game. But that meant their crews putting down in hot LZs, exposing their aircraft to withering attack from an enemy for whom downing one of the big helos would be the ultimate prize. They had been lucky. So far. Then they

Read Online Apache Ed Macy

launched their biggest operation yet- a complicated, high-risk airborne assault that launched a fleet of heavily armed helicopters into the Afghan Heart of Darkness. And then a report came over the net that one of the Chinooks was down . . . In Immediate Response, Major Mark Hammond, a Royal Marine flying with the RAF, tells the gripping inside story of the Chinook squadrons' war for the first time. It's a visceral, unputdownable combination of hi-tech and old-fashioned grit; an action-packed story shot through with a mix of aviation fuel and cordite . . .
