The key to
aquaponics is the
natural bacteria
found in the
growing bed (called
the biofilter) . The
bacteria eat
ammonia and turn

Access Free

Aquaponic

it into nitrates,
which are great
food for plants.

Without these
nitrifying bacteria,
the fish would die
in their own waste.

Without the
nitrates, the plants
wouldn't have
anything to eat.

Aquaponics is a
way to grow your
fish and plants at
the same time. You
feed the fish in
Aquaponics and
the fish will feed
your plants through

Access Free Aquaponic

their waste output.

There is no need to use extra fertilizers because the fish

provide rich nutrients for the plants. In

Aquaponics, less water is used for the plants.
