This book is an examination of American army legal proceedings that resulted from a series of moments when soldiers in a war zone crossed a line between performing their legitimate functions and committing crimes against civilians, or atrocities. Using individual judicial proceedings held within war-time Southeast Asia, Louise Barnett analyses how the American military legal system handled crimes against civilians and determines what these cases reveal about the way that war produces atrocity against civilians. Presenting these atrocities and subsequent trials in a way that considers both the personal and the institutional the author considers how and why atrocity happens, the terrain of justification, and the degree to which the army and American society have been willing to take military crimes against civilians seriously. Atrocity and American Military Justice in Southeast Asia will be of interest to students, scholars and professionals interested in Military Justice, Military history and Southeast Asian History more generally.

The mathematical theory of contact mechanics is a growing field in engineering and scientific computing. This book is intended as a unified and readily accessible source for mathematicians, applied mathematicians, mechanics, engineers and scientists, as well as advanced students. The first part describes models of the processes involved like friction, heat generation and thermal effects, wear, adhesion and damage. The second part presents many mathematical models of practical interest and demonstrates the close interaction and cross-fertilization between contact mechanics and the theory of variational inequalities. The last part reviews further results, gives many references to current research and discusses open problems and future developments. The book can be read by mechanical engineers interested in applications. In addition, some theorems and their proofs are given as examples for the mathematical tools used in the models.

Working for the police had criminal psychologist Christian Moll losing so much sleep that, despite years of successfully helping investigators unwind the twisted minds of murderers, he decided to call it quits. But when a disturbing pattern in recent cases begins to emerge, he chooses to postpone his self-imposed retirement in order to help out an old flame. Detective Katharina Rosenberg has a new case and a new cop killer on the run. When two colleagues are murdered in rapid succession, a shocking theory emerges: Is someone killing off the detectives Christian worked alongside solving homicide cases? And is Katharina next? Now, Katharina and Christian must team up once again to catch the murderer before it's too late. With their buried passion rising to the surface, they give in to their desire while racing against time to find the vengeful cop killer before he finds them.

The compelling story of the struggle by law enforcement and activists to dismantle the Fundamentalist Church of Jesus Christ of Latter Day Saints (FLDS) is finally told. In 1953, when police raided the Short Creek compound of the FLDS, it soon became a political and publicity nightmare eventually costing the governor of Arizona his job. Thus began 50 years of skittish public officials turning a blind eye to heinous offenses such as child abandonment, kidnapping, statutory rape, and incest, as well as massive tax and welfare fraud. Warren Jeffs became the new FLDS prophet and president in 2002, and anti-FLDS activists watched in horror as he used his boundless authority and the resources of a tax-supported community to devastate thousands of lives on cruel whims. This exposé presents a detailed, chilling account of how a hostile, destructive group can manipulate the U.S. judicial system. It is a mesmerizing journey into one of the United States's darkest corners, a story that stretches over three states and deep into the history of the powerful Mormon Church.
