The fourth edition of Auditing & Assurance Services is the most up-to-date auditing text on the market. All chapters and modules in the fourth edition have been revised to incorporate professional standards through SAS 116, AS7, international standards of auditing (ISAs), and unnumbered standards adopted through July 2009. New terminology from the AICPA's Clarity Project has been incorporated throughout the book. In addition, all chapters include new problems, Kaplan CPA Review simulations, and comprehensive case questions. Fraud awareness, a thorough understanding of internal controls, and the ability to use technology effectively are the hallmarks of a successful auditor in business today. With Auditing & Assurance Services, 4th edition, students are prepared to take on auditing's latest challenges. As a leader in fraud coverage, it is accompanied by the Apollo Shoes Case, the only standalone FRAUD audit case on the market (available online on the book's OLC). The text is also designed to provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructor's discretion without interrupting the flow of the text.

Focusing on auditing as a judgment process, this unique textbook helps readers strike the balance between understanding auditing theory and how an audit plays out in reality. The only textbook to provide complete coverage of both the International Auditing and Assurance Standards Board and the Public Company Accounting Oversight Board, Auditing reflects the contemporary evolution of the audit process. New additions to the book include expert updates on key topics, such as the audit of accounting estimates, group audit, and the Integrated Audit. Supplemented by extra on-line resources, students using this established text will be well-equipped to be effective auditors and to understand the role of auditing in the business world.

"Includes coverage of international standards and global auditing issues, in addition to coverage of PCAOB Auditing Standards, the risk assessment SASs, the Sarbanes/Oxley Act, and Section 404 audits."

This new edition is written with two major objectives: (1) to help readers understand audit decision making and evidence accumulation, and (2) reflect changes in the profession by integrating assurance and attestation service as well as risk issues. This 6th edition introduces two new tools that practitioners use to assess risk and to identify assurance service opportunities: Client Strategy Templates and Balanced Scorecards.

The first textbook based upon International Standards on Auditing (ISAs), this fully revised and updated fourth edition presents a structured approach to auditing principles using ISAs as its basis. The International Standards on Auditing are now widely regarded as the global benchmark for auditing standards and as such an important audit quality indicator. This book describes the developments and practical use of all ISAs, as well as significant national standards in different countries. The new edition has been updated in line with International Standards and presents a truly International perspective. The book provides students with a real-world perspective as close to current auditing practice and thinking as possible. Key features: Structure of the book following the four phases of the audit process Coverage of the latest auditing insights including technology and automated tools & techniques (data analytics) Updates of the most recent auditing & assurance standards, including ISA 315 and 540 Highlighting the broader range of assurance engagements Practice exam-style questions with end-of-chapter answers
