Came back home today to find that Apress has sent me the book I (and several others) have spent some time working on, "Beginning NetBeans IDE for Java Developers". It is focused on the features of the upcoming NetBeans IDE 8.1, hurray. It goes through the most important features of the IDE in a structured path, from installation, to creating ...

"Beginning NetBeans IDE for Java Developers" | Oracle ...
Beginners should use notepad/notepad++. If you have had sufficient experience with it, only then switch to an IDE, most preferrably NetBeans. Easy and fast, but doesn't offer as much functionality as other alternatives. But whatever you may hear about other IDEs being better than it, ignore it meanwhile.
