Hebrew tradition presents Haggai and Zechariah as prophetic figures arising in the wake of the Babylonian exile with an agenda of restoration for the early Persian period community in Yehud. This agenda, however, was not original to these prophets, but rather drawn from the earlier traditions of Israel. In recent years there has been a flurry of scholarly attention on the relationship between these Persian period prophets and the earlier traditions with a view to the ways in which these prophets draw on earlier tradition in innovative ways. It is time to take stock of these many contributions and provide a venue for dialogue and evaluation.

Culturally Sustaining Pedagogies raises fundamental questions about the purpose of schooling in changing societies. Bringing together an intergenerational group of prominent educators and researchers, this volume engages and extends the concept of culturally sustaining pedagogy (CSP)—teaching that perpetuates and fosters linguistic, literate, and cultural pluralism as part of schooling for positive social transformation. The authors propose that schooling should be a site for sustaining the cultural practices of communities of color, rather than eradicating them. Chapters present theoretically grounded examples of how educators and scholars can support Black, Indigenous, Latinx, Asian/Pacific Islander, South African, and immigrant students as part of a collective movement towards educational justice in a changing world. Book Features: A definitive resource on culturally sustaining pedagogies, including what they look like in the classroom and how they differ from deficit-model approaches. Examples of teaching that sustain the languages, literacies, and cultural practices of students and communities of color. Contributions from the founders of such lasting educational frameworks as culturally relevant pedagogy, funds of knowledge,
