Chapter 10 Capital Budgeting

Since capital budgeting projects are long-term investments, the cash flows which they generate are likely to take place years into the future. If a firm spends \$1000 today and receives back \$100 per year over the next 10 years, they have not broken even. Instead, the project has caused a significant reduction in firm value.

classroom/research experience ... with current real-world examples and online practice. Authors Robert Parrino, David Kidwell, and Thomas Bates believe that students who understand the intuition underlying the basic concepts of finance are better able to develop the critical judgments necessary to apply financial tools in real decision-making situations. Their text develops intuitive thinking while simultaneously helping students develop problem solving and computational skills. It then shows students how to apply intuition and analytical skills to decision making while integrating it all with valuation and building shareholder value.
