Tissues~~

What are the four major categories of tissues? 1. epithelial tissues (epithelium)- sheet of cells covering body surface or lining a body cavity 2. connective tissue- includes c.t. proper (fat and ligaments) cartilage, bone, and blood, provides support 3. nervous tissue- main component of the nervous system provides control

### Human Anatomy Chapter 4- Tissues

Tissue Membranes. A tissue membrane is a thin layer or sheet of cells that covers the outside of the body (for example, skin), the organs (for example, pericardium), internal passageways that lead to the exterior of the body (for example, abdominal mesenteries), and the lining of the moveable joint cavities. There are two basic types of tissue membranes: connective tissue and epithelial ...
