Every year, more than a million people file for bankruptcy. This book gives them a clear and complete overview of the bankruptcy process, explains the repercussions of filing for Chapter 7 bankruptcy and provides step-by-step instructions and all the forms necessary to file. It clearly outlines what debts can and cannot be eliminated in bankruptcy, what property debtors risk losing, how to protect assets and rebuild credit and how to deal with aggressive credit card companies seeking speedy credit repayment. State-by-state exemption tables included.

"For the third time in three decades world leaders reaffirmed their promise of "Education For All" when adopting Sustainable Development Goal 4 in 2015. It is the most far-reaching commitment to quality and equity in education so far, yet, there is no consensus on what the agenda means in practice. With a decade left until the 2030 deadline, Grading Goal Four calls upon the education community to engage more thoughtfully and critically with SDG 4 and related efforts. As an ever-growing number of actors and initiatives claim to contribute to its achievement, it is becoming clear that the ambitious but broad priorities within the goal are vulnerable to cherry-picking and misrepresentation, placing it at the heart of tensions between instrumentalist and rights-based approaches to education. This text, a critical analysis of SDG 4, provides a framework for examining trends and developments in education globally. As the first volume that examines early implementation efforts under SDG 4, Grading Goal Four formulates a critique along with strategies for moving forward. By scrutinising the challenges, tensions and power dynamics shaping SDG 4, it advances rights-based perspectives and strategies for effective implementation and builds capacity for strengthened monitoring and analysis of the goal"-

A Stanford psychologist offers a bold new understanding of empathy, and shows how we can expand our circle of care, even in these divisive times Empathy is in short supply. Isolation and tribalism are rampant. We struggle to understand people who aren't like us, but find it easy to hate them. Studies show that we are less caring than we were even thirty years ago. In 2006, Barack Obama said that the United States is suffering from an "empathy deficit." Since then, things only seem to have gotten worse. It doesn't have to be this way. In this groundbreaking book, Jamil Zaki argues that empathy is not a fixed trait--something we're born with or not--but rather a skill that we can all strengthen through effort. Drawing on both classic and cutting-edge research, including experiments from his own lab, Zaki shows how we can harness this new mindset to overcome toxic cultural divisions. He also tells the stories of people who are living these principles--fighting for kindness in the most difficult of circumstances. We meet a former neo-Nazi who is now helping extract people from hate groups, ex-prisoners discussing novels with the judge who sentenced them, Washington police officers changing their culture to decrease violence among their ranks, and NICU nurses fine-tuning their empathy so that they don't succumb to burnout. Written with clarity and passion, The War for Kindness is an inspiring call to action. The future may depend on whether we accept the challenge.

Two experts in monetary policy offer a unified framework for studying the role of money and liquid assets in the economy. In Money, Payments, and Liquidity, Ed Nosal and Guillaume Rocheteau provide a comprehensive investigation into the economics of money and payments by explicitly modeling trading frictions between agents. Adopting the search-theoretic approach pioneered by Nobuhiro Kiyotaki and Randall Wright, Nosal and Rocheteau provide a logically coherent dynamic framework to examine the frictions in the economy that make money and liquid assets play a useful role in trade. They discuss the implications of such frictions for the suitable properties of a medium of exchange, monetary policy, the cost of inflation, the inflation-output trade-off, the coexistence of money, credit, and higher return assets, settlement, and liquidity. After presenting the basic environment used throughout the book, Nosal and Rocheteau examine pure credit and pure monetary economies, and discuss the role of money, different pricing mechanisms, and the properties of money. In subsequent chapters they study monetary policy, the Friedman rule in particular, and the relationship between inflation and output under different information structures; economies where monetary exchange coexists with credit transactions; the coexistence of money and other assets such as another currency, capital, and bonds; and a continuous-time version of the model that describes over-the-counter markets and different dimensions of liquidity (bid-ask spreads, trade volume, trading delays).

Presenting a basic, arithmetic-based approach, CONTEMPORARY BUSINESS MATHEMATICS FOR COLLEGES, 17E uses step-by-step development of concepts, hands-on practice exercises, and real-world applications to effectively prepare students for careers in business. Practical skill-building activities are emphasized throughout as the book progresses, from the most basic to more complex business math topics. Numerous problems and examples are taken from actual businesses. In addition, self-check features such as end-of-section Concept Checks, end-of-chapter Bottom Lines, and end-of-chapter Review Problems enable students to test their understanding before advancing to other topics or assignments. Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

You don't make money by just buying and selling real estate, you make money by investing purposefully and knowing where the trends lie in any market. Shazia Virani, a realtor with a "wealth" of personal experience investing in real estate, explains how Canadians can do just that, in achieving their real estate dreams. Virani is a full-time, savvy real estate entrepreneur who has successfully been helping her clients buy, sell and invest in real estate for over a decade. As a highly accomplished real estate investor herself both in Canada and the US, she is dedicated to creating a higher quality of life for her clients, while sharing her vast knowledge and guiding others to accomplish their real estate goals.
