The Chart interfaces provide clients with the means to dynamically describe and populate a Chart when the diagram is viewed. The API is wide ranging and flexible, allowing you to illustrate many different scenarios graphically at runtime. The feature allows you to define any type of chart you require using JavaScript either as code or JSON. A good reference for the Chart interfaces and their use is the 'EA 15 Examples > Dynamic Charts' Package in the Enterprise Architect Example Model.

~~Dynamic Charts — Enterprise Architect User Guide~~

There are pre-set charts that can simply be dragged onto a diagram, and user defined charts where you can define the chart type, the content and the chart appearance. This expressive and flexible feature provides an invaluable tool for the Project Manager and, apart from day-to-day tracking, provides useful collateral for inclusion into executive presentations.

The updated 11th edition of the Aeronautical Chart User ' s Guide by the FAA is a great reference for novice pilots and professionals alike. Printed in full color with detailed examples, this book provides all the information students and pilots need to know about all the symbols and information provided on US aeronautical charts and chart navigation publications. Readers will find information on VFR charts, aeronautical chart symbols, helicopter route charts, flyway planning charts, IFR enroute charts, explanation of IFR enroute terms and symbols, Terminal Procedure Publications (TPPs), explanation of TPP terms and symbols, airspace classifications, and an airspace class table.

Go beyond the standard chart legends and learn the meaning behind all of the symbols found on aeronautical charts. The FAA publishes aeronautical charts for each stage of VFR (visual flight rules) and IFR (instrument flight rules) flight including training, planning, departure, enroute (low and high altitude), approach, and taxiing. This guide is an excellent reference book for novice and experienced pilots alike, as well as for international pilots as a means of becoming familiar with U.S. charts. The updated 14th Edition of the Aeronautical Chart User's Guide by the FAA Aeronautical Information Service is the definitive learning aid, reference document, and introduction to the weath of information provided on aeronautical charts and in chart navigation publications. This FAA publication includes explanations of all symbology used on the FAA charts including the world aeronautical charts, sectional aeronautical, terminal area, flyway planning, helicopter route, enroute low- and high-altitude, area, and oceanic route charts, as well as standard terminal arrival routes, standard instrument departures, and instrument approach procedures. The chart legends and airspace classifications tables are included. Illustrated throughout with full-color graphics.

This Chart User's Guide is an introduction to the Federal Aviation Administration's (FAA) aeronautical charts and publications. It is useful to new pilots as a learning aid, and to experienced pilots as a quick reference guide.

A critical reference tool for any aeronautical navigator, the ninth edition of the Aeronautical Chart User ' s Guide presents the most up-to-date information on charts adhering to Visual Flight Rule (VFR) and Instrument Flying Rule (IFR). Hundreds of color images throughout the book are paired with easy-to-understand explanations and definitions. This concise guide allows

pilots and students to successfully pre-plan flight paths through any type of environment from man-made obstacles to natural terrain. In addition, the updated Aeronautical Chart User ' s Guide is a great study aid for current pilots who are preparing for additional certification and for potential pilots who are interested in applying for their first license.

INTRODUCTION This Chart User's Guide is an introduction to the Federal Aviation Administration's (FAA) aeronautical charts and publications. It is useful to new pilots as a learning aid, and to experienced pilots as a quick reference guide. The FAA is the source for all data and information utilized in the publishing of aeronautical charts through authorized publishers for each stage of Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) air navigation including training, planning, and departures, enroute (for low and high altitudes), approaches, and taxiing charts.

"The Chart User's Guide is intended to serve as a learning aid, reference document, and an introduction to the wealth of information provided on the aeronautical charts and publications of the National Oceanic and Atmospheric Administration (NOAA). This guide can also serve as a basic review of chart information for experienced pilots"--Introduction.

Federal Aviation Administration Aeronautical Information Services Aeronautical Chart User's Guide Effective as of 30 January 2020 This Chart User's Guide is an introduction to the Federal Aviation Administration's (FAA) aeronautical charts and publications. It is useful to new pilots as a learning aid, and to experienced pilots as a quick reference guide. The FAA is the source for all data and information utilized in the publishing of aeronautical charts through authorized publishers for each stage of Visual Flight Rules (VFR) and Instrument Flight Rules (IFR) air navigation including training, planning, and departures, enroute (for low and high altitudes), approaches, and taxiing charts. Digital charts are available online at: * VFR Charts - https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/vfr/ * IFR Charts - https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/ifr/ * Terminal Procedures Publication - http://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/dtpp/ * Chart Supplements - https://www.faa.gov/air_traffic/flight_info/aeronav/digital_products/dafd/ Paper copies of the charts are available through an FAA Approved Print Provider. A complete list of current providers is available at http://www.faa.gov/air_traffic/flight_info/aeronav/print_providers/ The FAA Aeronautical Information Manual (AIM) Pilot/Controller Glossary defines in detail, all terms and abbreviations used throughout this publication. Unless otherwise indicated, miles are nautical miles (NM), altitudes indicate feet above Mean Sea Level (MSL), and times used are Coordinated Universal Time (UTC). The Notices to Airmen Publication (NOTAM) includes current Flight Data Center (FDC) NOTAMs. NOTAMs alert pilots of new regulatory requirements and reflect changes to Standard Instrument Approach Procedures (SIAPs), flight restrictions, and aeronautical chart revisions. This publication is prepared every 28 days by the FAA, and is available by subscription from the Government Printing Office. For more information on subscribing or to access online PDF copy, http://www.faa.gov/air_traffic/publications/notices/ In addition to NOTAMs, the Chart Supplement and the Safety Alerts/Charting Notices page of the Aeronautical Information Services website are also useful to pilots
