 I have a Cisco IP Phone 7942 and the user manual. There is nothing in the user manual relating to activating or turning on the voicemail feature. No one else here knows how to do it although all of their phones have the voicemail feature active. The simpler the problem, the more convoluted and arcane the solution I guess.

 I am installing Cisco ISE soon and have a question. Why can't I authenticate Cisco IP phone model 7942 using 802.1x? I see that the phone has this option (it is not enabled). I am told that Cisco IP Phones must be authenticated on ISE by using profiling or MAB. This uses a costly advanced license to accomplish this.
