Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application.

~~Clinical Decision Making: Case Studies in Medical Surgical~~

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity & Women's Health is the first installment in this innovative series, which provides over forty maternity and women's health case histories, questions, and responses based on real life client situations.

Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This unique resource contains 40 psychiatric nursing case studies and questions, based on real-life client situations. Organized by difficulty level, the cases in this book and questions about each case history help to keep the focus on the client and the nursing process. Questions and answers are designed to address the need for empathy, attitude adjustment, opened-mindedness, trust building, maintaining confidentiality, limit setting, delegating appropriately, collaborating with other professionals and making decisions. Each scenario is practical and realistic. Critical problems arising in psychiatric nursing are addressed throughout the book, including those both common and rare. The user has an opportunity to decide appropriate nursing action if encountering each of the problems presented, to reflect on whether the nursing staff in the scenario made the best decision, and to provide a rationale for his or her answer. The user can then consult the suggested answer/rationale for remediation, and find what a reasonable and prudent psychiatric nurse would do in that particular situation. Legal and ethical concerns are addressed throughout the cases, which simulate concerns arising in similar real-life situations that nurses find while practicing. Clients with psychiatric problems are encountered in a variety of settings -such as medical or community- so nurses not specializing in psychiatric nursing are represented in some of the cases.

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a a blueprints of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

Quite simply, Clinical Decision Making shortens the distance between theory and nursing practice like no other educational tool."--BOOK JACKET.

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity & Women's Health is the first installment in this innovative series, which provides over forty maternity and women's health case histories, questions, and responses based on real life client situations. Every case contains an introductory "blueprint" of variables that must be considered while evaluating a particular scenario, which are pertinent concerning the client, nursing protocol, and setting of care. Examples of these variables include age, gender, or culture of the client, the client with a pre-existing condition, legal issues, or communication skills. Each blueprint and case is different, just as each clinical situation is unique to others. By allowing learners to simulate the actual decision-making process, they can gain a comfort level to make informed clinical judgments that will help them become successful nurses. Quite simply, Clinical Decision Making shortens the distance between the classroom and nursing practice like no other educational tool.

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Medical-Surgical, Pharmacologic, and Psychiatric Nursing provides 120 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a a blueprints of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

Includes answers to the cases in the core book.
