Core Concepts of Law Enforcement Management combines the most important sections from police administration and managing police organization texts.

This text approaches law enforcement administration from a concept approach, which is somewhat different from approaches found in traditional textbooks on the topic. In "Concepts of Law Enforcement Administration," John Foust focuses on concepts that are essential to effective administration, as opposed to convoluted theory found in other books. In this book, you will find ten basic concepts that will help any administrator excel in his or her position. Concepts presented in this book are: understanding the basics of administration; how to be an effective leader and manager; building relations, both internally and externally; establishing sound practices of accountability; managing your resources efficiently; instituting positive values and ethical guidelines; hiring and managing your personnel effectively; understanding major personnel legal issues; keeping your organization healthy; and protecting your agency from liability. To fully address the meaning of each concept, several readings are presented in each category, with over fifty readings found in the text. The reader will leave this text with a comprehensive grasp of the issues involved in law enforcement administration. John Foust is employed as a Special Assistant to the Chief of the the Metropolitan Police Department in Washington, D.C. He has previously worked as a senior-level manger in the training division, in the department's Professional Development Bureau. Prior to moving to Washington, Mr. Foust was the director of the Del Mar Regional Police Academy in Corpus Christi, Texas. He began his career in law enforcement in New Mexico in 1978. He holds a bachelor's degree in criminology and a master's degree in criminal justice. He teaches classes part time in criminal justice for the University of Maryland University College and the University of Maryland, College Park.

Basic Concepts in Criminology is an introduction to criminology. It is intended to serve as resource material for prospective students of criminology and particularly for law enforcement officers in training and in the field. Criminology as a social science discipline is structured from a combination of concepts of sociology, psychology, and law--all relevant subjects to the law enforcement profession. Remarkably, criminology is not very popular as a stand-alone subject among disciplines of choice for undergraduate students or even for those going in for graduate studies. Instead, what we notice in most universities' curricula are related disciplines, like criminal justice, criminal investigation, crime scene investigation, forensic, law enforcement, and so forth. Material contained in this book will be particularly useful to law enforcement officers; the Police, Corrections, and Security officers. In this book, I have attempted to approach and make this subject much easier and interesting to prospective students of Criminology in general and to law enforcement officers in particular, to whom knowledge of this subject is an important professional asset. I hope it will stir and arouse their interest and that of prospective students of Criminology in general.

This author team had students in mind when they wrote the book on Criminal Law. Criminal Law: Core Concepts features: A commitment to clarity, reflected in the writing style, organization, pedagogy, and design Shrewd case editing that hones in on salient themes and principles Engaging and informative examples throughout the text Plain English discussion of the Model Penal Code Timely coverage of contemporary topics, such as street crime

For courses in Introduction to Law Enforcement. A current and practical look at policing practices from a big-picture perspective. Law Enforcement in the 21st Century keeps readers up-to-date in this ever-evolving field providing a synthesis of the latest research literature with practical insights from the field. The important theme of linkage blindness is a central theme throughout, highlighting the multi-jurisdictional complexities of policing in the United States and abroad. Linkage blindness is then used as an important pedagogical tool to frame realistic critical-thinking exercises. The Fourth Edition reflects the many challenges that have faced policing in the recent months and years. New chapter introductions -- drawn from contemporary issues related to the use of force, community relations, and gun control -- update the text for the current classroom. New concepts are added to the discussion, including student appreciation for the importance of police legitimacy. Greater attention is also paid to new technologies being piloted across the United States.

Today's society is becoming increasingly more likely to resist the lawful actions of law enforcement officers. It is critical for officers to have the necessary defensive tactics (DT) skills to successfully overcome resistance in an efficient, safe, and legal manner. The answer to achieving these results is NOT in teaching thousands of possible responses to an infinite number of potential attacks. The answer is to first use a Risk Management approach and identify the most common and dangerous attacks on officers. Next, a successful DT program must stress core concepts, proper body mechanics, natural instinctive movement, and proven principles of survival. Advanced Concepts in Defensive Tactics: A Survival Guide for Law Enforcement presents the instruction of Master Police Instructor Chuck Joyner. Developed during his tenure as a FBI use of force instructor, and expanded by his lifelong dedication to the martial arts, Joyner's Survival Sciences DT program relies on adhering to advanced concepts rather than memorizing countless techniques. Based on extensive research and actual

street experience, this manual: Focuses on defensive tactics that are easily taught, understood, and applied by officers regardless of their size, strength, or athletic ability Covers hand-to-hand tactics, groundwork, weapon retention/weapon disarming, handcuffing, and the survival mindset Explains the necessary integration of hands-on DT techniques with common law enforcement secondary weapons (e.g., baton, pepper spray, TASER) Introduces a new use of force model (Dynamic Resistance-Response Model) which correctly depicts the dynamic encounter between an officer and a resistor by first focusing on the level of resistance by the subject Offers practical solutions reducing officer, department, and municipality liability Provides password access to the author's supplemental training videos online Chuck Joyner, a recognized expert in the use of force, lectures throughout the United States and internationally on myriad law enforcement topics. Mr. Joyner holds several FBI instructor certifications in force-related training, has earned black belts in four martial arts, and was awarded master rank in two styles. He was inducted into the Martial Arts Hall of Fame as instructor of the year in 2006. Mr. Joyner was employed by the CIA from 1983 to 1987, and has worked as a Special Agent with the FBI since 1987. Chuck was interviewed on February 29, 2012 on American Heroes Radio.

Thoroughly updated and revised to reflect the most current events and information, *Law Enforcement and Justice Administration: Strategies for the 21st Century, Second Edition*, provides a comprehensive examination of the prevailing criminal justice organizations present in law enforcement, courts, and correctional systems. Using a realistic, field-based approach that combines theory with application, this text explores the operations, issues, and practices that administrators within criminal justice face today. This Second Edition blends historic administrative themes and concepts with contemporary issues and future trends. Throughout the text, the Contextual Themes Model (Organization, Employee Relations, Open Systems, Social Equity, Client-oriented Service) of criminal justice administration is provided to aid the readers in connecting the concepts of administration to key terms, theories, and ultimately to the application of the concepts. *Law Enforcement and Justice Administration, Second Edition* is organized into three parts. Part I develops key concepts from the history of administrative practices and organizes them into the five Contextual Themes. Part II applies these administrative concepts to contemporary criminal justice administration using the Contextual Themes. Part III explores the application of the key concepts with discussions on the cutting-edge issues that face criminal justice administrators now and in the future. *Women, Gender, and Crime: Core Concepts* provides you with a complete and concise view into the intersection of gender and the criminal justice system. Author Stacy L. Mallicoat explores core topics on women as victims, offenders, and criminal justice professionals as they interact with various areas of the criminal justice system. She investigates relevant subjects that are not found in many traditional texts, including women who work as victim advocates and international issues of crime and justice relating to gender. Key Features: This text discusses women and victimization prior to covering women as offenders, because victimization is often a precursor to offending. Case Studies present compelling examples that connect concepts to real-life occurrences to reinforce learning and cover key issues, such as, sexual victimization in the military, stalking on college campuses, financial challenges for incarcerated women, pregnancy and policing, and self-care for victim advocates. Coverage of critical topics introduce you to important issues such as gender representation in criminal justice academia, multiple marginalities and LGBT populations, cyberstalking, labor trafficking, and challenges faced by women as criminal justice practitioners. Statistics, graphs, and tables demonstrate the most recent trends in the field to give students an accurate picture of the criminal justice system today.

A comparative and collaborative study of the foundational principles and concepts that underpin different domestic systems of criminal law.
