Darwins Theory Of Evolution  
Packet

Darwin's Theory of Evolution is a theory in crisis in light of the tremendous advances we've made in molecular biology, biochemistry and genetics over the past fifty years. We now know that there are in fact tens of thousands of irreducibly complex systems on the cellular level. Specified complexity pervades the microscopic biological world.

by natural selection ...

Darwin's Theory of Evolution  
Evolution , as understood by  
biologists, is the change  
through time that occurs in  
populations of organisms in  
response to changing  
environments. The changes,  
coded in the molecules of  
DNA , are transmitted from  
generation to generation and  
over the history of the  
Earth have resulted in  
progressively more complex  
life forms.

Answers: Definition &  
Evidence | Live ...

Evolutionary theory was bastardized and turned into the pseudo-science of "Social Darwinism" in the latter 19th century giving rise to the eugenics movement and contributing to so-called "scientific racism." Evolution, actually, posits common descent so to use it to justify one race is better than the next is wrong-headed and stupid.
