ethics regimes, and enable innovative models of collaboration. We provide an initial survey of structures and design patterns, as well as examples of how we leverage this approach to rapidly build out ethics-centered governance in biomedical research. While there is no one-size-fits-all solution, we argue for learning from ongoing data science collaborations and building on from existing standards and tools.

Kauffman Series On  
Business Intelligence

Within the enterprise, the data governance team should initially establish abstract policies that reflect such campaigns and core set of requirements, then expand upon such areas or requirements with a more refined and exacting set of policies. A hierarchy of policies and references establishes the domain and specificity for each.
