Whether you're 20, 40, 60 or older, many of us are still looking for an answer to that perennial question, "What do I want to be when I grow up?" In Designing Your Life, Silicon Valley design innovators Bill Burnett and Dave Evans use their expertise to help you work out what you want -- and how to get it. Their phenomenally successful Life Design course has been tried and tested by thousands of people, from students to mid-career professionals to retirees contemplating a whole new future. Now in book form for the first time, their simple method will teach you how to use basic design tools to create a life that will work for you. Using lots of real-life stories and proven techniques like reframing, prototyping and mind-mapping you will learn how to build your way forwards, step-by-positive-step, to a life that's better by a design of your own making. Because a well-designed life means a life well-lived.

Life, just like a design problem, is full of constraints--time, money, age, location, and circumstances. You cannot have everything, and if you want more out of it, you have to be creative about how to make what you need and what you want co-exist. This requires design thinking. Design the Life You Love uses a simple but proven creative thinking and design process to give ordinary people new tools to think about life differently, and also includes fascinating examples from the world of art and design that relate to each step of the process, plus guided creative exercises."

Don't spend your whole life searching for the right job; make it the most important job to design the right life. Pernille Spiers-Lopez left Denmark for the United States as a young, naïve entrepreneur. Years later, she became CEO of IKEA North America and then Global HR manager for 130,000 employees. But she soon learned—staring at the roof of the ambulance that was rushing her to the ER—that the job had a price. So this is success. I am away from my family, my children, and my life. This can ' t really be success... In Design Your Life, follow Pernille on her journey of personal struggle and triumph. Be with her as she climbs out of her own self-denial and darkest day. Watch her summon the focus and strength within to carve out a life by design and discover a more balanced paradigm of living, one in which success is defined not by how much money we make but by our personal leadership and commitment to ourselves and others.

This book explores influential designers ' sketchbooks as a truer reflection of a designer ' s thought processes, preoccupations, and problem-solving strategies than can be had by simply viewing finished projects. Highly personal and idiosyncratic, sketchbooks offer an arena for unstructured exploration, a space free from all budgetary and client constraints. Visually arresting objects in their own right, this book aims to elevate sketches from mere ephemera to important documents where the reader can glean valuable insight into the creative process, and apply it to their own practices. Featured designers include Ralph Caplan, Nigel Holmes, Chris Bigg, Eva Jiricna, Jason Murn, Gary Baseman, Marian Bantjes, and many others.
