Otolaryngology 4th Edition ...

This text presents rather succinctly a broad coverage of more common otolaryngology problems in children. It departs from the usual textbook format by presenting the various topics as problems and symptoms and develops the differential diagnoses and rational and contemporary approaches to therapy from this tangible base.

Differential Diagnosis in Pediatric

Dizziness is one of the most common complaints among patients presenting to primary care physicians, neurologists, and otolaryngologists. This symptom is nonspecific and includes a broad differential diagnosis. The current review aims to present a general overview of the approach to dizziness as well as to discuss the more common causes in detail.
