---

Laboratory Experiments for Introduction to General ...

Introduction. Laboratory experiments have provided considerable insight and quantitative information about many of the physical processes which affect the fluid ocean. Although often made with the purpose of investigating some fundamental process in fluid dynamics, motivation for making laboratory experiments frequently comes directly from a need to improve understanding of processes in the oceans, or in some other geophysical fluid such as the fluid interior or atmosphere of the Earth and ...

Laboratory Experiment - an overview | ScienceDirect Topics  
Remember that the most important aspect of the lab introduction is the usefulness and practicality of the experiment. This section should provide a rationale for the relevance of the work. The relevance of the work is the degree of its importance at the moment and in this situation to solve a certain problem, task or issue. What does this mean?

the purpose for doing the experiment that is to be reported. When scientists do research, the main purpose that guides their work is to contribute to the knowledge of their field. That's why the scientific context they establish in their introductions usually consists of summarizing previous research reports published in the field. A scientific contribution to the knowledge of the field can be understood only within the ...

Chemistry: Undergraduate Organic Laboratory Experiments  
Usually, the introduction is one paragraph that explains the objectives or purpose of the lab. In one sentence, state the hypothesis. Sometimes an introduction may contain background information, briefly summarize how the experiment was performed, state the findings of the experiment, and list the conclusions of the investigation.

Laboratory Experiments | Psychology | tutor2u

Introduction This report discusses an experiment to study the relationship of temperature and pressure of an ideal gas (air) that was heated in a closed container. Because the ideal gas was in a closed container, its volume remained constant. The objective of the experiment is to test whether the ideal equation of state holds. In the equation,

Writing a Science lab report - Research & Learning Online  
Introduction The introduction section is one of the last parts that you should write. In biology lab reports, the introduction is like a framework for the whole text and it shows that you fully understood the topic and the purpose of the experiment. In this part, it is helpful to jot down facts and references and you can also use lecture notes.
