Early Intervention Games | Teachers Pay Teachers
As pediatric therapists, we tend to take the importance of early intervention as a given. Many parents, however, many not be fully aware of these benefits. If they notice delays in their child's development, some parents may choose to take a 'wait and see' approach and hold off on seeking help for far too long. The truth is that early intervention is absolutely essential for achieving ...

200 Essential Preschool Activities promotes children's learning, helps improve their functional skills, and encourages interaction in the classroom. This resource provides preschool, pre-kindergarten, and student teachers with an abundance of developmentally appropriate lessons, all developed by the author and used in her own classroom for more than fifteen years. These adaptable, open-ended activities and strategies complement any early childhood program's core curriculum. 200 Essential Preschool Activities provides activities for and information on: Creative centers, including dramatic play areas and discovery and sensory areas Learning games, including turn-taking and board games, academic games, and cooperative and active games Group lessons, including circle time, social lessons, hands-on skill builders, and musical games and finger plays Arts and crafts, including child-centered expressive art and creative tools and methods Classroom structure, including classroom areas and centers and creating learning opportunities Parent involvement Julienne M. Olson has been teaching early childhood special education since 1995. She holds a bachelor's degree in early childhood special education and a master's degree in early childhood special education.

Parents have the power to help babies and toddlers at risk for developmental delays make important strides—but many are confused and intimidated as to how. In this easy-to-navigate guide, leading experts present more than 100 games and activities designed to strengthen vital communication and social skills in children from birth to age 3. Everyday chores and routines—like waking up and going to sleep, getting dressed, and mealtimes—are transformed into learning opportunities that promote crucial abilities, such as how to imitate others or use simple hand gestures to convey wants and needs. Parents are the most important people in their kids' lives. Now they can be the best teachers, too. Includes user-friendly features and practical tools, in a convenient large-size format.

A delightful way to build children's self-esteem andself-confidence—from age three to twelve. The key ingredient in children's development, emotionally,socially, and intellectually, is a strong sense of their ownself-worth. The 300 games and activities in this fun book will give them just that. These joyful activities help children learn how tomake friends, express feelings, trust others, accept themselves,use their imaginations, and more. The book combines upbeat,positive advice—including tips for betterparenting—with step-by-step directions for each activity. BARBARA SHER, MA, OTR (Whitehorn, California) has 30years' experience as a teacher and occupational therapist,specializing in pediatrics. Under the sponsorship of the Center forIntercultural Education of Georgetown University, she conductsself-esteem workshops for parents, teachers and children around theworld. A delightful way to build children's self-esteem andself-confidence—from ages three to twelve. The key to children's development—emotionally, socially,and intellectually—is a strong sense of their own self-worth.The 300 games and activities in this fun book will give them justthat. Barbara Sher, OT (Whitehorn, CA), has 30 years' experience as ateacher and occupational therapist, specializing in pediatrics. Sheconducts self-esteem workshops for parents, teachers and childrenaround the world.

LEARNING THROUGH PLAY One of the best ways for children with autism, Asperger's, and sensory processing disorders to learn is through play. Children improve their motor skills, language skills, and social skills by moving their bodies and interacting with their environment. Yet the biggest challenges parents, teachers, and loved ones face with children on the autism spectrum or with sensory processing disorders is how to successfully engage them in play. Pediatric occupational therapist Tara Delaney provides the answer. In 101 Games and Activities for Children with Autism, Asperger's, and Sensory Processing Disorders, she shows you how to teach your children by moving their bodies through play. These interactive games are quick to learn but will provide hours of fun and learning for your child. And many of the games can be played indoors or outdoors, so your child can enjoy them at home, outside, or on field trips. More than one hundred games that help your child: make eye-contact, stay focused, and strengthen his or her motor skills associate words with objects and improve language and numerical skills learn how to interact with others, how to take turns, and other social skills needed for attending preschool and school
