The first ever playbook for B2B salespeople on how to win clients and customers who are already being serviced by your competition, from the author of *The Only Sales Guide You'll Ever Need* and *The Lost Art of Closing*. Like it or not, sales is often a zero-sum game: Your win is someone else's loss. Most salespeople work in mature, overcrowded industries, your offerings perceived (often unfairly) as commodities. Growth requires taking market share from your competitors, while they try to do the same to you. How else can you grow 12 percent a year in an industry that's only growing by 3 percent? It's not easy for any salesperson to execute a competitive displacement--or, in other words, "eat their lunch." You might think this requires a bloodthirsty "whatever it takes" attitude, but that's the opposite of what works. If you act like a Mafia don, you only make yourself difficult to trust and impossible to see as a long-term partner. Instead, this book shows you how to find and maintain a long-term competitive advantage by taking steps like:

- ranking prospective new clients not by their size or convenience to you, but by who stands to gain the most from your solution.
- understanding the different priorities for everyone in your prospect's organization, from the CEO to the accountants, and addressing their various concerns.
- developing a systematic contact plan for all those different stakeholders so you can win over the right people at the organization in the optimal sequence.

Your competitors may be tough, but with the strategies you'll discover in this book, you'll soon be eating their lunch.

This eighth edition includes accessible guidance on the following topics: maximising endurance, strength and performance how to calculate your optimal calorie, carbohydrate and protein requirements advice on improving body composition specific advice for women, children and vegetarians eating plans to cut body fat, gain muscle and prepare for competition sport-specific nutritional advice.

The USA Today bestseller by the star sales speaker and author of *The Sales Blog* that reveals how all salespeople can attain huge sales success through strategies backed by extensive research and experience. Anthony Iannarino never set out to become a salesman, let alone a sales manager, speaker, coach, or writer of the most prominent blog about the art and science of great selling. He fell into his profession by accident, as a day job while pursuing rock-and-roll stardom. Once he realized he'd never become the next Mick Jagger, Iannarino turned his focus to a question that's been debated for at least a century: Why are a small number of salespeople in any field hugely successful, while the rest get mediocre results at best? The answer is simple: it 's not about the market, the product, or the competition—it 's all about the seller. And consequently, any salesperson can sell more and better, all the time.

Over twenty-five years, Iannarino has boiled down everything he's learned and tested into one convenient book that explains what all successful sellers, regardless of industry or organization, share: a mind-set of powerful beliefs and a skill-set of key actions, including...

- Self-discipline: How to keep your commitments to yourself and others.
- Accountability: How to own the outcomes you sell.
- Competitiveness: How to embrace competition rather than let it intimidate you.
- Resourcefulness: How to blend your imagination, experience, and knowledge into unique solutions.
- Storytelling: How to create deeper relationships by presenting a story in which the client is the hero and you're their guide.
- Diagnosing: How to look below the surface to figure out someone else's real challenges and needs.

Once you learn Iannarino's core strategies, picking up the specific tactics for your product and customers will be that much easier. Whether you sell to big companies, small companies, or individual consumers, this is the book you'll turn to again and again for proven wisdom, strategies, and tips that really work.

Hacking Leadership is Mike Myatt's latest leadership book written for leaders at every level. Leadership isn't broken, but how it's currently being practiced certainly is. Everyone has blind spots. The purpose of Hacking Leadership is to equip leaders at every level with an actionable framework to identify blind spots and close leadership gaps. The bulk of the book is based on actionable, topical leadership and management hacks to bridge eleven gaps every business needs to cross in order to create a culture of leadership: leadership, purpose, future, mediocrity, culture, talent, knowledge, innovation, expectation, complexity, and failure. Each chapter: Gives readers specific techniques to identify, understand, and most importantly, implement individual, team and organizational leadership hacks. Addresses blind spots and leverage points most leaders and managers haven't thought about, which left unaddressed, will adversely impact growth, development, and performance. All leaders have blind-spots (gaps), which often go undetected for years or decades, and sadly, even when identified the methods for dealing with them are outdated and ineffective – they need to be hacked. Showcases case studies from the author's consulting practice, serving as a confidant with more than 150 public company CEOs. Some of those corporate clients include: AT&T, Bank of America, Deloitte, EMC, Humana, IBM, JP Morgan Chase, Merrill Lynch, PepsiCo, and other leading global brands. Hacking Leadership offers a fresh perspective that makes it easy for leaders to create a roadmap to identify, refine, develop, and achieve their leadership potential--and to create a more effective business that is financially solvent and professionally desirable.
