Cholesterol: Your Essential Guide To The Good And The Bad ...

LDL cholesterol carries fat molecules to the cells and is thought of as the 'unhealthy' cholesterol. This is because it can build up in your blood, leading to blockages in your arteries. HDL on the other hand, helps remove LDL from the body, lowering your cholesterol levels and the risk of fat build-up.

---

Good fats, bad fats and lowering your cholesterol

Eating a diet high in saturated fat increases production in the liver of LDL or bad cholesterol. Saturated fat also slows down how quickly cholesterol is removed from your body. Cutting down on saturated fat in the diet and replacing it with unsaturated fats is an effective way of reducing blood cholesterol.
