Technicians must check waterflow switches, tamper switches, and supervisory devices when servicing the fire alarm system. This typically adds at least 20% to the cost of fire alarm inspection and testing. Other devices take longer to service so they're more expensive than basic devices. These inspections and tests include smoke detector sensitivity, duct detector, vesda, ir detector, and gas detector. Additionally, facilities with elevators require special inspection and testing.

NFPA 72®: Inspection, Testing, and Maintenance of Fire ...

To inspect and test the fire alarms, it takes a team of two technicians. The first technician is stationed at the fire alarm panel, while the second technician goes from floor to floor inspecting and testing the smoke detectors, fire alarm pull stations, and the fire alarm horns & strobes. The technician at the fire panel checks to see that the fire alarm panel is activated when a smoke detector or fire alarm pull station is activated.
