Technology has evolved into society's primary tool for organization, communication, research, and problem solving. It is essential that everyone learn the fundamental skills that can be applied towards being an effective user of today's technology as well as a lifelong learner of future technology. *Fluency with Information Technology: Skills, Concepts, and Capabilities* provides the framework for developing confident users who can both adapt to changes and solve problems as technology evolves.

Computers, communications, digital information, software are "the constituents of the information age" are everywhere. Being computer literate, that is technically competent in two or three of today's software applications, is not enough anymore. Individuals who want to realize the potential value of information technology (IT) in their everyday lives need to be computer fluent "able to use IT effectively today and to adapt to changes tomorrow. *Being Fluent with Information Technology* sets the standard for what everyone should know about IT in order to use it effectively now and in the future. It explores three kinds of knowledge "intellectual capabilities, foundational concepts, and skills" that are essential for fluency with IT. The book presents detailed descriptions and examples of current skills and timeless concepts and capabilities, which will be useful to individuals who use IT and to the instructors who teach them.

This book is suitable for undergraduate students in computer science and engineering, for students in other disciplines who have good programming skills, and for professionals. Computer animation and graphics are now prevalent in everyday life from the computer screen, to the movie screen, to the smart phone screen. The growing excitement about WebGL applications and their ability to integrate HTML5, inspired the authors to exclusively use WebGL in the Seventh Edition of Interactive Computer Graphics with WebGL. This is the only introduction to computer graphics text for undergraduates that fully integrates WebGL and emphasizes application-based programming. The top-down, programming-oriented approach allows for coverage of engaging 3D material early in the course so students immediately begin to create their own 3D graphics. Teaching and Learning Experience This program will provide a better teaching and learning experience-for you and your students. It will help: *Engage Students Immediately with 3D Material: A top-down, programming-oriented approach allows for coverage of engaging 3D material early in the course so students immediately begin to create their own graphics.*Introduce Computer Graphics Programming with WebGL and JavaScript: WebGL is not only fully shader-based-each
