In Morpho: Joint Forms and Muscular Functions, artist and teacher Michel Lauricella presents a unique approach to learning to draw the human form. In this book, Lauricella offers a mechanical vision of the

Download File PDF Free Siris Ko Phool Nepali Novels

body, allowing us to see the important connections between the body's joints and its muscular functions. By reducing joint shapes to very simple forms, such as the pulley and the sphere, and then demonstrating the relationships that muscles have to these joints, you acquire much more insight into both the shape and movements of the human body, which in turn improves your powers of observation and thus your drawing skills. Geared toward artists of all levels--from beginners through professionals--this handy, pocket-sized book will help spark your imagination and creativity. (Publisher's Note: This book features an "exposed" binding style. This is intentional, as it is designed to help the book lay flat as you draw.)

Palpasa Café tells the story of an artist, Drishya, during the height of the Nepalese Civil War. The novel is partly a love story of Drishya and the first generation American Nepali, Palpasa, who has returned to the land of her parents after 9/11. It is often called an anti-war novel, and describes the effects of the civil war on the Nepali countryside that Drishya travels to.

This book presents the outcomes of the 2017 national workshop and international conference organized by CEENR of ISEC, Bengaluru and Assam University Silchar. Addressing the threats to biodiversity and sustainable development resulting from the impacts of human induced pressures on ecosystems and global-warming-driven climate change is a major challenge. It requires increased knowledge and an enhanced information base in order to devise local policies to improve the adaptive capacity of vulnerable socio-ecological systems in developing countries. In this context, the book presents research that has the potential to benefit the environment and empower communities. It appeals to researchers investigating diverse aspects of socio-ecological-biological systems to create strategies for resource use, conservation and management to ensure sustainability.

From the Foreword Umberto Quattrocchi has brought us some amazing and useful works through the various dictionaries that he has compiled. This time it is for two very important plant families the palms and the cycads that are synthesized here in these two volumes. Each entry is fascinating not just for the botany and full nomenclature of the plant species but for all the associated uses, folklore and interactions with other organisms. ...These entries are fascinating glimpses of natural history. ...
Botanists, conservationists, ethnobotanists, anthropologists, geographers, bird watchers, naturalists,

historians and those of many other disciplines will find these volumes a most valuable and useful resource. It is the sort of book that will be in frequent use in my library. ----- Professor Sir Ghilleen Prance FRS, VMH, Former Director, Royal Botanic Gardens, Kew Following the same format as Umberto Quattrocchi's highly praised and well-used previous works, The CRC World Dictionary of Palms: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology brings together the vast and scattered literature on palms and cycads to provide better access to information on these economically important plants. Each genus and species has a detailed morphological description and includes a list of synonyms and vernacular names in many languages. Bibliographies accompany each entry which are comprehensive, up-to-date and multi-lingual. The detailed information for every entry on habitats, economic uses, historical and biographical data, botanical exploration, and linguistics will be useful for any library involved with botany, herbal medicine, pharmacognosy, medicinal and natural product chemistry, ecology, ethnobotany, systematics, general plant science, agriculture or horticulture. Umberto Quattrocchi is the author of the bestselling CRC World Dictionary of Plant Names, winner of the prestigious Hanbury Botanical Garden Award. His most recent multi-volume work, CRC World Dictionary of Medicinal and Poisonous Plants, received strong praise as being "... an unparalleled starting place—a tool of first resort for any thoughtful researcher. Quattrocchi and CRC have delivered a dictionary like no other, a learned finger pointing in the right direction." —John de la Parra, Northeastern University, Boston, Massachusetts, USA, from Economic Botany, Vol. 68, 2014
