This book examines the risks to freedom of expression, particularly in relation to the internet, as a result of regulation introduced in response to terrorist threats. The work explores the challenges of maintaining security in the fight against traditional terrorism while protecting fundamental freedoms, particularly online freedom of expression. The topics discussed include the clash between

freedom of speech and national security; the multijurisdictional nature of the internet and the implications for national sovereignty and transnational legal structures; how to determine legitimate and illegitimate association online; and the implications for privacy and data protection. The book presents a theoretical analysis combined with empirical research to demonstrate the difficulty of combatting internet use by terror organizations or individuals and the range of remedies that might be drawn from national and international law. The work will be essential reading for students, researchers and policy makers in the areas of Constitutional law; Criminal Law, European and International law, Information and Technology law and Security Studies.

"This publication seeks to identify the

relationship between freedom of expression and Internet privacy, assessing where they support or compete with each other in different circumstances. The book maps out the issues in the current regulatory landscape of Internet privacy from the viewpoint of freedom of expression. It provides an overview of legal protection, self-regulatory guidelines, normative challenges, and case studies relating to the topic. With this publication UNESCO aims to provide its Member States and other stakeholders, national and international, with a useful reference tool containing up-to-date and sharp information on emerging issues relevant to both developed and developing countries. Multiple stakeholders, preferably in dialogue, can use it in their own spheres of operation, adapting where appropriate from the range of experiences as recorded in these pages. The publication also

supplies additional sources of reference for interested readers to use to further investigate each of the subjects highlighted. The publication explores a range of issues, such as: (1) threats to privacy that have developed through the Internet, (2) international legal standards on privacy and responses to these emerging issues, (3) complex intersections between the rights to privacy and freedom of expression, (4) UNESCO recommendations to states and corporations for better practice, (5) overview of literature, background material and tools on international and national policy and practice on privacy and freedom of expression on the Internet. In the coming years, UNESCO will specifically seek to disseminate information about good practices and international collaboration concerning the points of intersection between freedom of

expression and privacy. Research on safeguarding the principle of freedom of expression in Internet policy across a range of issues will continue to be part of UNESCO's normative mandate and technical advice to stakeholders."--Publisher's description

In the mid-1950s, Septima Poinsette Clark (1898-1987), a former public school teacher, developed a citizenship training program that enabled thousands of African Americans to register to vote and then to link the power of the ballot to concrete strategies for individual and communal empowerment. In this vibrantly written biography, Katherine Charron demonstrates Clark's crucial role--and the role of many black women teachers--in making education a cornerstone of the

twentieth-century freedom struggle. Using Clark's life as a lens, Charron sheds valuable new light on southern black women's activism in national, state, and judicial politics, from the Progressive Era to the civil rights movement and beyond.

Civil rights activist Septima Poinsette Clark (1898-1987) developed a citizenship education program that enabled tens of thousands of African Americans to register to vote and to link the power of the ballot to concrete strategies for individual and communal empowerment. Clark, who began her own teaching career in 1916, grounded her approach in the philosophy and practice of southern black activist educators in the decades leading up to the 1950s and 1960s, and then trained a committed cadre of grassroots black women to lead this literacy revolution in community stores, beauty shops, and

churches throughout the South. In this engaging biography, Katherine Charron tells the story of Clark, from her coming of age in the South Carolina lowcountry to her activism with the Southern Christian Leadership Conference in the movement's heyday. The enhanced electronic version of the book draws from archives, libraries, and the author's personal collection and includes nearly 100 letters, documents, photographs, newspaper articles, and interview excerpts, embedding each in the text where it will be most meaningful. Featuring more than 60 audio clips (more than 2.5 hours total) from oral history interviews with 15 individuals, including Clark herself, the enhanced e-book redefines the idea of the "talking book." This book analyzes the promotion and

protection of freedom of religion in the international arena with a particular focus on the role and influence of the US International Religious Freedom Act, 1998. It also investigates the impact of the IRFA on the legislation and policies of third countries and the EU. The book develops the story of the protection of religious freedom through foreign policy by showing how religious laws affect and shape a more communitarian dimension of the notion of freedom of religion which stands in contrast with a traditionally Western individualistic understanding of the right. It is argued that it is still possible to defend the unstable category of freedom of religion or belief especially when major violations are at stake. The book presents a balanced contribution to the academic debate on the promotion and protection of religious freedom. The comparative approach and interdisciplinary

methodology make it a valuable resource for academics, students and policy-makers in Law, International Relations and Strategic Studies.

Using the metaphor of ‘ constitutional space ’ , this thought-provoking book describes the confluence and convergence of powers in a constitutional system, comprised of the principled exercise of the legislative, executive and judicial powers of constitutional government. Addressing the issues surrounding the freedom of religion or belief, the book explores the dimensions of constitutional space and the content of this freedom, as well as comparative approaches to defining and protecting this freedom.

In 1964, the Student Nonviolent Coordinating Committee decided to establish Freedom Schools as part of its

Freedom Summer campaign in Mississippi. With a curriculum developed by dedicated educators, SNCC workers, and an equally dedicated staff of teachers and student volunteers, the schools provided a learning experience and teaching style that revealed to students who had known only the "stay in your place" experience of segregated education what schools should, and could, be. The achievements of the students involved in Freedom Summer lifted the expectations of students who followed them and hastened the end of segregated schools in Mississippi. In *Legacy of a Freedom School*, Sandra E. Adickes recalls her experiences working with the SNCC, reminding us all of the powerful Freedom Summer.
