A legendary Senator advises our next President on the commonsense values necessary to lead our nation United States Senator Robert C. Byrd is the longest-serving member of the United States Senate in the history of our great Republic. Senator Byrd has served the people of West Virginia, and the nation, for fifty-four years, and has served alongside eleven Presidents. He was twice elected by his colleagues to the position of Senate Majority Leader and currently is chairman of the powerful Senate Appropriations Committee. Byrd has lived through two world wars, the Great Depression, the civil rights movement, the Cold War, the resignation of a U.S. President, the 9/11 terrorist attacks, and traumatic military conflicts around the globe, including Iraq and Vietnam. Byrd has been a witness to it all. And now, in his ninetieth year of life, he wants to share the commonsense lessons he has learned from his unique vantage point in history. In Letter to a New President, Byrd recounts lessons drawn from his remarkable life as a young boy growing up poor in the coalfields of southern West Virginia to his meteoric rise to the pinnacles of power in Washington, D.C. From his unique vantage point in history, Byrd focuses his observations on underappreciated and seldom discussed virtues like personal responsibility, careful consideration before making decisions, and a sense of decency and fairness even toward fierce opponents. A student of history and a defender of our Constitution, Byrd looks to the past for lessons and, in Letter to a New President, studies present failures as guides for constructive lessons for the future. This book will help the next President grapple with the heavy demands of the office. Every American who cares about where this country is heading will find rich wisdom in Byrd's sage advice. Enlightened by a wide-ranging knowledge of American history and a love for the guiding principles of the Constitution, Byrd's observations sharpen the focus of the historical moment in which we find ourselves, as no one but Senator Byrd can.

Drawing from Eastern and Western literatures, Heinrich Zimmer presents a selection of stories linked together by their common concern for the problem of our eternal conflict with the forces of evil. Beginning with a tale from the Arabian Nights, this theme unfolds in legends from Irish paganism, medieval Christianity, the Arthurian cycle, and early Hinduism. In the retelling of these tales, Zimmer discloses the meanings within their seemingly unrelated symbols and suggests the philosophical wholeness of this assortment of myth. Copyright © Libri GmbH. Sex. God. You know the two subjects are connected; you just don't have the words for how they are connected. And they cannot be separated. Where the one is, you will always find the other. When you actually live and feel and engage, you discover that the physical things around us are like windows into more. And when you talk about sexuality, you quickly end up in the spiritual--because 'this' is always about 'that.' Something deeper. Something behind it all. You can't talk about sexuality without talking about how we were made. About how we relate to each other. About how we were made to relate to each other. And that will inevitably lead you to who made us. At some point you have to talk about God. To make sense of the one, we have to explore the other. That is what this book is about.

Dreams are at the heart of a process where tangible and intangible worlds are intimately intermingled. Indeed, a dream is an intangible phenomenon occurring in a physical body that stands in an environment both material and informational (intangible). A systematic investigation of the connections between dreams and reality sheds new light on the dream process and on the functioning of the mind. This book invites you, the reader, to discover the results you can achieve through a more comprehensive and unified approach to the dream process. It gives you advice on how to carry out your own research. Reading this book will help you become better aware of the role played by your body at the meeting point between dreams and reality, between the tangible and the intangible (Chapter 1). The book describes an efficient method for observing the dream process (Chapter 2) and explains the results you can achieve with it through your own experimentation (Chapter 3). Through your personal exploration of the whole dream process you will be able to verify for yourself the reality of certain faculties of the mind which are commonly considered to be "paranormal". You will see that they can be explained rationally. Chapter 4 of the book explains how you can use the dream process to find answers to your questions, whether they regard your daily life (health, work, relationships, life guidance) or your artistic or scientific creativity. The last chapter (Chapter 5) explains why faculties today considered to be paranormal are destined to a natural collective awakening. With this book, I invite you to observe your dreams and their connections with your reality, with a mind as neutral as possible. This is the best way to understand the meaning of your dreams. Try, then, to forget all you have ever heard about dreams, and just look at them and observe the whole dream process, and not only the dreams. Everything I assert in the book can be verified through personal experience by using the proposed method of observation. With this method everyone, even the most skeptical person, can verify the existence of unusual faculties of the mind, and learn to develop and use them. Key words: dreams and reality, precognitive dreams, future in dreams, premonitory dreams, dream interpretation, meaning of dreams, paranormal faculties, telepathy, dreams and health, dreams and abundance, dreams and the past, mind and body, nightmares, dreaming brain, lucid dreams
