gas laws virtual lab answer key - PDF Free Download

and pressure are constant, $V_1/n_1 = V_2/n_2$. The final law is Guy-Loussac's Law, $P_1/T_1 = P_2/T_2$, the pressure is directly proportional to the temperature of an ideal gas when the volume is at a constant. The Ideal Gas Law, $PV=nRT$ was made by combining the four laws

relationship to the combined gas law gives the following:
$$\frac{P_1 V_1}{n T_1} = \frac{P_2 V_2}{n T_2}$$
 The constant in the above equation is the ideal gas law constant, or simply, the gas constant, R , calculated for a "near ideal gas," such as H_2 . Replacing "Constant" with R in equation (2) gives the Ideal Gas Law:
