<i>General and Systematic Pathology: with STUDENT CONSULT ...</i> The book Underwood's Pathology: a Clinical Approach (published in 2013), was named after Sir James, and it won the 2014 British Medical Association Student Textbook Award. Co-editor of General and Systematic Pathology, Churchill Livingstone, 2009 (5th edition).

Rev. ed. of: General and systematic pathology / edited by J.C.E. Underwood, S.S. Cross. 5th ed. 2009.

We aim at testing knowledge acquisition and application, albeit data analysis is tested in fewer instances. The questions are presented in Calibri (body) theme font to provide the best readability. The questions’ stems are short, bold, and typed in size 14 font. Each question has four options. It is hard for a test taker who doesn’t know the answer to guesstimate. We have used plausible distractors and avoided double negatives. Furthermore, we have used the finished and unfinished statement styles and avoided complex structures of questions. We have implemented the (how common is ...) and (what is the likelihood that ...) styles of questions as we believe that the reader’s intuition and clinical sense last longer, in mind, than figures do.

This book presents pathology in the context of modern medicine and cellular biology, and concentrates on important concepts and principles. Key points are highlighted and summaries convey the core facts.

This highly acclaimed textbook is written specifically for students of medicine and related health science subjects. It progresses from a review of general pathology principles and disease mechanisms through detailed discussions of the pathologic entities associated with each organ system. Nearly 700 full-color photographs and pathology slides bring the content to life. The fifth edition features extensive updates throughout to reflect the latest discoveries in cellular and molecular pathology, and offers a web site that presents self-assessment material and illustrated clinical case studies. Contents perfectly matches needs on medical students. Very clinical approach matches integrated courses. Extensive International Advisory Board validates contents. Each organ system chapter begins with a brief review of normal structure and function, emphasizing aspects that are important to an understanding of the subsequently discussed disease processes. Offers a superb collection of clinical photographs, histopathology images, and graphics, approximately 700 in all, that richly depict the appearance of both healthy and diseased tissues. New co-editor, Dr Simon Cross. Structure of chapters revised to make the book much easier to use during courses that are problem- or case-based. Several new contributors and re-written chapters. Expanded International Advisory Board.

The new series of Crash Course continues to provide readers with complete coverage of the MBBS curriculum in an easy-to-read, user-friendly manner. Building on the success of previous editions, the new Crash Courses retain the popular and unique features that so characterised the earlier volumes. All Crash Courses have been fully updated throughout. More than 130 illustrations present clinical, diagnostic and practical information in an easy-to-follow manner Friendly and accessible approach to the subject makes learning especially easy Written by students for students - authors who understand exam pressures Contains ‘Hints and Tips’ boxes, and other useful aide-mémoires Succinct coverage of the subject enables ‘sharp focus’ and efficient use of time during exam preparation Contains a fully updated self-assessment section - ideal for honing exam skills and self-testing Self-assessment section fully updated to reflect current exam requirements Contains ‘common exam pitfalls’ as advised by faculty Crash Courses also available electronically! Online self-assessment bank also available - content edited by Dan Horton-Szar! Now celebrating over 10 years of success - Crash Course has been specially devised to help you get through your exams with ease. Completely revised throughout, the new edition of Crash Course is perfectly tailored to meet your needs by providing everything you need to know in one place. Clearly presented in a tried and trusted, easy-to-use, format, each book in the series gives complete coverage of the subject in a no-nonsense, user-friendly fashion. Commencing with ‘Learning Objectives’, each chapter guides you succinctly through the topic, giving full coverage of the curriculum whilst avoiding unnecessary and often confusing detail. Each chapter is also supported by a full artwork programme, and features the ever popular ‘Hints and Tips’ boxes as well as other useful aide-mémoires. All volumes contain an up-to-date self-assessment section which allows you to test your knowledge and hone your exam skills. Authored by students or junior doctors - working under close faculty supervision - each volume has been prepared by someone who has recently been in the exam situation and so relates closely to your needs. So whether you need to get out of a fix or aim for distinction Crash Course is for you!

This new edition presents a fresh look at Macbeth.

A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Featuring 640 multiple choice questions, this is a comprehensive revision guide for candidates taking the basic sciences component of the FRCOphth and ICO examinations. It is highl

Whether you’re preparing for the USMLE Step 1, Step 2, or studying for course exams, Rapid Review Pathology, 5th Edition by acclaimed author Dr. Edward Goljan is your go-to guide for up-to-date, essential pathology information throughout medical school. User-friendly features that make this comprehensive review tool the top choice of students worldwide include an outline format, full-color layout, High-Yield Margin Notes, Key Points, and a strong clinical correlation throughout. This eBook experience allows you to search all of the text, figures, references, and animations, designed to produce a more rounded learning experience.

Underwood’s Pathology (formerly General and Systematic Pathology) is an internatonally popular and highly acclaimed textbook, written and designed principally for students of medicine and the related health sciences. Pathology is presented in the context of modern cellular and molecular biology and contemporary clinical practice. After a clear introduction to basic principles, it provides comprehensive coverage of disease mechanisms and the pathology of specific disorders ordered by body system. An unrivalled collection of clinical photographs, histopathology images and graphics complement the clear, concise text. For this seventh edition, the entire book has been revised and updated. Well liked features to assist problem-based learning – including body diagrams annotated with signs, symptoms and diseases and a separate index of common clinical problems – have been retained and refreshed. The advent of whole genome sequencing and increased knowledge of the genetics of disease has been recognised by updated sections in many chapters. Download the enhanced eBook version (from studentconsult.com) for anytime access to the complete contents plus bonus learning materials, including: clinical case studies – to help apply essential principles to modern practice the fully revised, interactive self-assessment section with over 200 questions and answers – to check your understanding and aid exam preparation especially produced video and podcast tutorials – to further explain and bring to life key topics bonus pathology crosswords – to recall key words and topics in a fun and interactive way This all combines to make Underwood’s an unsurpassed learning package in this fascinating and most central medical speciality. From reviews of previous editions: "...it truly is an outstanding textbook...highly recommended" Histopathology "...no doubt it will remain a bestseller – excellent value for undergraduates" Journal of Clinical Pathology "A book of this kind deserves a wide readership" Modern Pathology "... the definitive textbook of pathology...expands on previous success and cements its position as the market leader for undergraduate pathology" The Bulletin A prize winner: Previous editions have won First Prize in the Medical Writers Group of the Society of Authors Awards, the British Book Design and Production Awards and the British Medical Association Student Textbook Award.

Written specifically for athletic trainers, the updated second edition of Clinical Pathology for Athletic Trainers: Recognizing Systemic Disease emphasizes practical knowledge; development of clinical skills, including evaluation and treatment; and development of clinical decision-making abilities. Inside Clinical Pathology for Athletic Trainers, Second Edition, you will find an expanded discussion of the pathophysiology associated with general medical conditions, as well as case studies which facilitate the student’s ability to formulate a differential diagnosis and make clinical decisions. Dr. Daniel P. O’Connor and Dr. A. Louise Fincher have incorporated all of the didactic and psychomotor competencies listed within the General Medical Conditions and Pathology of Injuries and Illness domains from the Fourth Edition of the NATA Educational Competencies into this unique text. Competencies that are addressed throughout the text are conveniently listed at the beginning of each chapter in which they are referenced. Individual lab activities are included within some chapters to aid in the development of the psychomotor skills related to evaluating general medical illnesses. Instructors will enjoy new ancillary materials such as test bank questions and PowerPoint slides. What’s New in the Second Edition: • New chapters on pharmacology; dermatology and eyes, ears, nose, throat, and mouth • Integration of NATA Position Statements and Consensus Statements • Expanded discussion on the physical exam, including detailed instructions for evaluation procedures • New illustrations and a color atlas • New icons throughout the text to represent action to be taken by the athletic trainer during an evaluation, such as physician referral or activation of emergency action plan Lab Activities Inside the Second Edition: • Use of Pharmacology Resources • Assessment of Temperature • Assessment of Vital Signs (heart rate, blood pressure, and respiration rate) • Cardiac Auscultation • Pulmonary Auscultation and Percussion • Peak Flow Expiratory Rate • Abdominal Auscultation, Percussion, and Palpation • Urinalysis • Assessment of Blood Glucose Levels • Use of the Otoscope • Use of the Ophthalmoscope • Sensory Function • Motor Function • Reflex Function • Cranial Nerve Assessment With expanded discussions and case studies, new chapters and lab activities, and an emphasis on the development of clinical skills, the Second Edition of Clinical Pathology for Athletic Trainers: Recognizing Systemic Disease is a must-have for today’s athletic training students and clinicians.
