Have you ever thought that statistics can be used to learn the colours of precipitates? What if I say that you only need a phone, earphones and a mood to learn chemical reactions? This is only a tiny part of what the book has to offer, to make your JEE preparation easier. In his book, *The JEE*, Sunny talks about the problems as small as being disturbed by whispering students in a study room to significant ones like solving the toughest question of JEE Advanced. He will take you through some of his special techniques, which will increase your efficiency to grasp all concepts that the JEE wants you to know. You will be made to ponder upon all factors that appear as hurdles in your JEE preparation and will be told the way in which you can overcome the obstacles that have been demotivating you. Also, at last, you will know what you should do and not do during those two years that decide the IIT you will walk in.

The thirteenth edition of this classic text continues and further enriches the rich legacy of the previous editions. In a clear and authoritative style, this edition explains the basic principles of physiology while emphasizing their clinical significance in day-to-day medical practice.

Contemporary Archaeology and the City foregrounds the archaeological study of post-industrial and other urban transformations through a diverse, international collection of case studies. Over the past decade contemporary archaeology has emerged as a dynamic force for dissecting and contextualizing the material complexities of present-day societies. Contemporary archaeology challenges conventional anthropological and archaeological conceptions of the past by pushing temporal boundaries closer to, if not into, the present. The volume is organized around three themes that highlight the multifaceted character of urban transitions in present-day cities - creativity, ruination, and political action. The case studies offer comparative perspectives on transformative global urban processes in local contexts through research conducted in the struggling, post-industrial cities of Detroit, Belfast, Indianapolis, Berlin, Liverpool, Belem, and post-Apartheid Cape Town, as well as the thriving urban centres of Melbourne, New York City, London, Chicago, and Istanbul. Together, the volume contributions demonstrate how the contemporary city is an urban palimpsest comprised by archaeological assemblages - of the built environment, the surface, and buried sub-surface - that are traces of the various pasts entangled with one another in the present. This volume aims to position the city as one of the most important and dynamic arenas for archaeological studies of the contemporary by presenting a range of theoretically-engaged case studies that highlight some of the major issues that the study of contemporary cities pose for archaeologists.
