The highball can be a very light drink, and that's why it is ideal for happy hour. It all depends on how much soda and whiskey you pour. For example, if you pour an 80-proof whiskey and follow the recipe as given, your drink would have an alcohol content of about 9 percent ABV (18 proof). Then again, if you double up on the whiskey, opt for a high-proof whiskey, or pour less ginger ale, the drink can almost double to 18 percent ABV.
