The Pulitzer Prize–nominated author of Little Big Man returns with perhaps one of his most imaginative alternate realities yet: a matriarchal society. Women reign supreme in the not-so-distant future, where Georgie Cornell has no choice but to wear the high heel shoe on the other foot. Swept into the chaotic world of publishing, he is at the mercy of his female bosses, especially if his pencil skirt is an inch too short. Georgie only

has one male coworker he can lean on for a bit of support, and his friend Charlie's fascination with gender roles borders on the scandalous for Georgie's taste. Still, when Georgie loses his job it's Charlie he turns to for comfort. Spilling a drink on his expensive dress, he has no choice but to wear the women's clothes Charlie keeps in secret on the way home. The simple journey quickly turns chaotic when Georgie is taken in by the police for the crime of being a transvestite. A prison escape is only the start of this piercing, insightful, and prescient look at gender norms. "Imagined with such ferocity and glee that we assent to it almost in spite of ourselves . . . A brilliant accomplishment by one of our best novelists." —The New York Times Book Review

This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the entire twentieth century. This extensively revised edition follows the successful format of previous editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.
