What guidance does academic research really provide to economic policy development?

The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance. Asserting that there are no

Poland, December

Six decades after its establishment, the United Nations and its system of related agencies and programs are perpetually in crisis.

While the twentieth-century's world wars gave rise to groundbreaking efforts at international organization in 1919 and 1945, today's UN is ill-equipped to deal with contemporary challenges to world order. Neither the end of the Cold War nor the aftermath of 9/11 has led to the "next

generation” of  
multilateral institutions.  
But what exactly is  
wrong with the UN, and  
how can we fix it? Is it  
possible to retrofit the  
world body? In his  
succinct and hard-  
hitting analysis, Thomas  
G. Weiss takes a  
diagnose-and-cure  
approach to the world  
organization’s inherent  
difficulties. In the first

half of the book, he considers: the problems of international leadership and decision making in a world of self-interested states; the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South; the structural problems of managing the UN's many overlapping

jurisdictions, agencies,  
and bodies; and the  
challenges of  
bureaucracy and  
leadership. The second  
half shows how to  
mitigate these maladies  
and points the way to a  
world in which the  
UN's institutional ills  
might be "cured." His  
remedies are not based  
on pious hopes of a  
miracle cure for the UN,

but rather on specific and encouraging examples that could be replicated. With considered optimism and in contrast to received wisdom, Weiss contends that substantial change in intergovernmental institutions is plausible and possible. The new and expanded second edition of this well-
