TPS FAQs □ essential info | ICAS

ICAS Assessments are online assessments, designed to recognise and reward academic excellence. The assessments are based on the curricula for the relevant year. Students are asked to demonstrate a deeper, integrated, and thorough level of learning. To ensure an engaging and beneficial experience for all students, new ICAS assessments are developed annually for each subject in every year level.

This volume contains the papers of the 10th AG STAB (German Aerospace Aerodynamics Association). In this association all those scientists and engineers from universities, research-establishments and industry are involved, who are doing research and project work in numerical and experimental fluid mechanics and aerodynamics for aerospace and other applications. Many of the contributions are giving first results from the "Luftfahrtforschungsprogramm der Bundesregierung (German Aeronautical Research Program) 1995-1998". Some of the papers report on work sponsored by the Deutsche Forschungsgemeinschaft, DFG, which also was presented at the symposium. The volume gives a broad overview over the ongoing work in this field in Germany.

This fifth edition of the Macquarie, measuring a new awareness of environment and fragility, will mark a turning of the tide in our consciousness, in the span of our response, in the way we give voice to place □ and place to voice. (Her Excellency Ms Quentin Bryce, Governor-General of the Commonwealth of Australia) Since the Macquarie Dictionary was first published in 1981, its reputation as Australia's national dictionary has gone from strength to strength. It is now nationally and internationally regarded as the standard reference on Australian English. A comprehensive and up-to-date account of our variety of English, it not only includes all those words and senses peculiar to Australian English, but also those common to the whole English-speaking world.

M. Rycroft, FacultyMember, InternationalSpaceUniversity e-mail:Rycroft@isu.isunet.edu "The Space Transportation Market: Evolution or Revolution?" was the question which was the focus for the papers presented, and also the Panel Discussions, at the fifth annual Symposium organised by the International Space University. Held in Strasbourg, France, for three lively days at the end of May 2000, the Symposium brought together representatives of the developers, providers and operators of space transportation systems, of regulatory bodies, and of users of the space transportation infrastructure in many fields, as well as experts in policy and market analysis. From the papers published here, it is clear that today's answer to the question tends more towards evolution than to revolution. The space launch industry is still not a fully mature one, and is still reliant on at least partial funding by governments. Better cooperation is essential between governments, launch providers, satellite builders and satellite operators in order to reduce the problems which the space transportation market faces today.
