How to identify roman coins

An introductory guide to identifying Roman coins . The suggested approach for identification or Roman coins. STEP 1 Work out the denomination of the coin using the information and pictures under denominations. Once you have established this you can roughly date the coin within the Roman period (i.e. if it is a radiate to AD 215-295). This will cut down the number of possible emperors that might appear on the obverse.

An introductory guide to identifying Roman coins

It provides a visual aid for the identification of coins commonly found in Britain, covering the following elements: Emperors: you can search on any Roman ruler, emperor or empress, finding out more about them, the denomination of coin struck for them and the mints in operation in their reign. You will also be able to view the latest coins of that ruler recorded on the database.

Romanorum - Identifying a Roman Coin

Note that, alongside gold and bronze, silver Roman coinage from the mid-3rd century onward uses various bronze-silver alloys, and are deemed ' silver ', ' billon ', or not specified. From the mid-4th century onward, ' billon ' coins only contain trace elements of silver. It is recommended for these coins to search for silver and billon, or billon and bronze, if uncertain.

Online Coins of the Roman Empire: Search

Roman coins were so widely accepted that border areas assumed that only coins that looked Roman could be valid. So when the barbaric areas needed additional coins they made their own. If you find a coin which appears Roman but has an impossible legend (all " I " s for instance), it may be a barbaric imitation. The style is also usually very crude.
