A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

A history of the industrial and construction machines built by the International Harvester Company along with Hough and Dresser.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing many of these classic works in affordable, high quality, modern editions, using the original text and artwork.

The developmental history of the tractors built by the dominant agricultural manufacturer of the early 20th Century, International

# Read Book Ih 560 Service Manual

Harvester, is dramatically told in *The Farmall Dynasty*. The book traces the evolution of the Farmall tractor from the early Titans and Moguls through to modern times. The book includes well-researched accounts of the development of the original Farmall, the Letter Series, 4100, Cub, and other legendary IHC tractors, with first-hand accounts from factory engineers describing the challenges they faced.

Ancient farmers used draft animals for plowing but the heavy work of harvesting fell to the humans, using sickle and scythe. Change came in the mid-19th century when Cyrus Hall McCormick built the mechanical harvester. Though the McCormicks used their wealth to establish art collections and universities, battle disease, and develop birth control, members of the family faced constant scrutiny and scandal. This book recounts their story as well as the history of the International Harvester Company (IHC)--a merger of the McCormick and Deering companies and the world's leader in agricultural machinery in the 1900s.

With data drawn directly from the McCormick/International Archives, this book provides collectors with all the information they'll need about IH tractors. This data book includes technical specifications, serial numbers, and codes for engines, carburetors, magnetos and options.
