Clarkdale processors feature 16 PCIe 2.0 lanes, which can be used in 1x16 or 2x8 configuration. Clarkdale and Arrandale contain the 32 nm dual core processor Hillel and the 45 nm integrated graphics device Ironlake, and support switchable graphics. Only certain higher-end CPUs support AES-NI and 1GB Huge Pages. Server / Desktop processors

Westmere (microarchitecture) - Wikipedia

For the desktop Clarkdale (Core i5 and Core i3) chips, Intel is using the 32nm Westmere manufacturing process, which is a die-shrink of the 45nm Nehalem architecture.

Benchmarks: Intel's 32nm Clarkdale | ZDNet

Clarkdale is the code name for an Intel processor, initially sold as desktop Intel Core i5 and Core i3 and Pentium. It is closely related to the mobile Arrandale processor; both use dual-core dies based on the Westmere 32 nm die shrink of the Nehalem microarchitecture, and have integrated Graphics as well as PCI Express and DMI links.
